

Local Control Accountability Plan 2016-2019

What will it take to close the achievement gap in Travis Unified?

Our data shows that we have six student subgroups performing below our target goals on multiple measures. They include African American students, Hispanic/Latino students, socioeconomically disadvantaged students, English learners, students with disabilities, and foster youth. Three of the groups, socioeconomically disadvantaged students, English learners, and foster youth, have been identified by the state as needing targeted support, and our plan focuses on their needs plus the needs of our other three underperforming subgroups. We are committed to the success of all students.

This plan operationalizes our theory of action for closing the achievement gap. The following principles underline the actions outlined in the plan.

- All students who will live independently as adults are capable of mastering the core curriculum.
- If we work together as a district team, we have the capacity to close the achievement gap. Our schools are safe and generally high performing; our staff is smart, skilled, and focused on student success; and our challenges are not overwhelming.
- If the first time they work on a concept, students receive carefully
 planned, engaging instruction using research-based strategies, at
 least 85% of students will be able to master the concept without
 intervention (instruction outside the regular class).
- In order to succeed in school, all children must read at or above grade level by the end of third grade. We need to provide the right staff time, instruction, and support to ensure all students meet this critical target.
- Learning gaps must be closed quickly before they become large and difficult to overcome. Scheduling intervention within the school day guarantees that all students who need support to stay on pace with their peers will receive it.

- Our teachers are highly skilled professionals. If they have student performance data and time to analyze it together, they can design and implement the instruction students need to close learning gaps. The solutions to student learning problems lie within collaborative teams of our talented and creative professionals, not outside our system.
- Some students need additional time outside the school day to fill learning gaps so they don't fall behind. Time, not learning, becomes the variable. English learners need time to master English as well as time to learn the concepts in the core curriculum.
- Students learn best when they feel safe and connected to school. When students are anxious or their basic needs are not met, their capacity to succeed with challenging new concepts is impacted.
- We need to work as partners with families, who are their children's first and most important teachers.
- To close the achievement gap, we need to go beyond the core curriculum and provide all students with the kinds of enriching experiences that affluent families are able provide for their children, including experiences in the arts, music, science, technology, and career exploration. These experiences are highly motivating, develop creativity, allow students to solve complex problems, apply what they have learned in the core curriculum, and connect students to the world outside of school. Core curriculum alone will not prepare children for the future they face, and ensuring equitable access to enriching experiences is essential if we are to close the achievement gap.

Research-based strategies

- Common daily instructional schedules with time for regrouping students for targeted instruction
- Pacing guides that outline a guaranteed and viable curriculum
- Response to Instruction and Intervention (Rtl²) with Intervention Specialists to teach small groups
- Strategic support classes taken concurrently with core classes to provide pre-teaching, re-teaching, and instruction to close skill gaps
- Regular, facilitated Professional Learning Community meetings to analyze data, plan improvements to instruction, group students for small group instruction, and engage in collaborative inquiry into best practices
- Kagan cooperative learning strategies to engage students in hypothesizing, testing ideas, practice, and exploring content
- Elementary music programs to enhance math performance and belonging
- Arts programs with integrated instruction in reading, writing, speaking, and listening English language arts skills
- A2A attendance tracking system to identify students whose attendance is interfering with their success
- Singapore math to develop deep conceptual understanding of mathematical concepts in the early grades, leading to increased access to in the most rigorous college preparatory high school math curriculum
- READY! for Kindergarten to ensure all students start school ready to master grade level concepts
- Technology to support learning, including online learning
- PBIS systems to teach students appropriate behavior
- Socio-emotional learning and character education
- Career Technical Education that reflects industry trends and local economic direction to prepare students for careers and to connect them to school
- Parent Project parenting strategies
- Summer home learning to replace summer learning loss with performance gains
- Robotics to provide practice in solving complex problems in a highly engaging context

Definitions

A2A = attendance tracking program

AMAO = Annual Measurable Achievement Objectives for English learners. Students meet AMAO 1 when they make expected annual progress on the CELDT test, and students meet AMAO 2 when they become proficient in English on schedule.

API = Academic Performance Index (previous target was 800, system being revised by the state)

CA Standards = California's content standards in English Language Arts, Mathematics, English Language Development, Science, and other subject areas

CAHSEE = California High School Exit Exam required for graduation

CELDT = annual English learner progress monitoring test

CTE = Career Technical Education

ELA = English Language Arts

ELD = English Language Development instruction for English learners

FTE = Full Time Equivalent, a full time teacher

IA = Instructional Assistant

IAB = Interim Assessment Block, provided by Smarter Balanced to allow teachers to monitor student progress on standards

LCAP = Local Control Accountability Plan

LCFF = Local Control Funding Formula, refers to California's new school funding method and the unrestricted funds districts receive

LEA = Local Educational Agency (school district)

PBIS = Positive Behavior Interventions and Supports

PD = Professional Development for teachers or classified instructional staff

PLC = Professional Learning Community, teacher group that analyzes data, selects areas for collaborative inquiry, and plans improvements to instruction and intervention instruction for students who are struggling

Rtl² = Response to Instruction and Intervention, a system of strategic progress monitoring and support for students who are not meeting academic or behavioral expectations; support ranges from general reteaching and support needed by all students to intensive support needed by only a few students

SARB = School Attendance Review Board (district level)

SART = School Attendance Review Team (school level)

SGF = LCFF Supplemental Grant Funds, funds the district receives on top of base LCFF funds to serve English learners, foster children, and socioeconomically disadvantaged students

Smarter Balanced = the new online testing system that replaced the state's STAR system

STEM = Science, Technology, Engineering, and Mathematics

Tier I, Tier II, Tier III = Rtl² terms for instruction and support needed by all students (Tier I, general), small groups of students (Tier II, moderate), and a few students (Tier III, intensive).

Title I = Federal funds to serve low performing students

Title II = Federal funds for professional development

Title III = Federal funds for English learners

TOSA = Teacher On Special Assignment (outside the classroom)

UC a-g = Courses required for college admission; the 15 college preparatory academic courses required by most colleges

* = sample size too small to report while maintaining student privacy, seen in data tables

§ 15497.5. Local Control and Accountability Plan and Annual Update Template.

Introduction:

LEA: Travis Unified School District Contact (Name, Title, Email, Phone No

Contact (Name, Title, Email, Phone Number): Sue Brothers, Director of Curriculum, Instruction, and Assessment, sbrothers@travisusd.org, (707) 437-8223

Local Control and Accountability Plan and Annual Update Template

LCAP Year: 2015-18

The Local Control and Accountability Plan (LCAP) and Annual Update Template shall be used to provide details regarding local educational agencies' (LEAs) actions and expenditures to support pupil outcomes and overall performance pursuant to Education Code sections 52060, 52066, 47605.5, and 47605.5, and 47606.5. The LCAP and Annual Update Template must be completed by all LEAs each year.

For school districts, pursuant to Education Code section 52060, the LCAP must describe, for the school district and each school within the district, goals and specific actions to achieve those goals for all pupils and each subgroup of pupils identified in Education Code section 52052, including pupils with disabilities, for each of the state priorities and any locally identified priorities.

For county offices of education, pursuant to Education Code section 52066, the LCAP must describe, for each county office of education-operated school and program, goals and specific actions to achieve those goals for all pupils and each subgroup of pupils identified in Education Code section 52052, including pupils with disabilities, who are funded through the county office of education Local Control Funding Formula as identified in Education Code section 2574 (pupils attending juvenile court schools, on probation or parole, or mandatorily expelled) for each of the state priorities and any locally identified priorities. School districts and county offices of education may additionally coordinate and describe in their LCAPs services provided to pupils funded by a school district but attending county-operated schools and programs, including special education programs.

Charter schools, pursuant to Education Code sections 47605.5, and 47605.5, and 47606.5, must describe goals and specific actions to achieve those goals for all pupils and each subgroup of pupils identified in Education Code section 52052, including pupils with disabilities, for each of the state priorities as applicable and any locally identified priorities. For charter schools, the inclusion and description of goals for state priorities in the LCAP may be modified to meet the grade levels served and the nature of the programs provided, including modifications to reflect only the statutory requirements explicitly applicable to charter schools in the Education Code.

The LCAP is intended to be a comprehensive planning tool. Accordingly, in developing goals, specific actions, and expenditures, LEAs should carefully consider how to reflect the services and related expenses for their basic instructional program in relationship to the state priorities. LEAs may reference and describe actions and expenditures in other plans and funded by a variety of other fund sources when detailing goals, actions, and expenditures related to the state and local priorities. LCAPs must be consistent with school plans submitted pursuant to Education Code section 64001. The information contained in the LCAP, or annual update, may be supplemented by information contained in other plans_(including the LEA plan pursuant to Section 1112 of Subpart 1 of Part A of Title I of Public Law 107-110) that are incorporated or referenced as relevant in this document.

For each section of the template, LEAs shall comply with instructions and should use the guiding questions as prompts (but not limits) for completing the information as required by statute. Guiding questions do not require separate narrative responses. However, the narrative response and goals and actions should demonstrate each guiding question was considered during the development of the plan. Data referenced in the LCAP must be consistent with the school accountability report card where appropriate. LEAs may resize pages or attach additional pages as necessary to facilitate completion of the LCAP.

State Priorities

The state priorities listed in Education Code sections 52060 and 52066 can be categorized as specified below for planning purposes, however, school districts and county offices of education must address each of the state priorities in their LCAP. Charter schools must address the priorities in Education Code section 52060(d) that apply to the grade levels served, or the nature of the program operated, by the charter school.

A. Conditions of Learning:

Basic:_degree to which teachers are appropriately assigned pursuant to Education Code section 44258.9, and fully credentialed in the subject areas and for the pupils they are teaching; pupils have access to standards-aligned instructional materials pursuant to Education Code section 60119; and school facilities are maintained in good repair pursuant to Education Code section 17002(d). (Priority 1)

Implementation of State Standards: implementation of academic content and performance standards and English language development standards adopted by the state board for all pupils, including English learners. (Priority 2)

Course access: pupil enrollment in a broad course of study that includes all of the subject areas described in Education Code section 51210 and subdivisions (a) to (i), inclusive, of Section 51220, as applicable. (Priority 7)

Expelled pupils (for county offices of education only): coordination of instruction of expelled pupils pursuant to Education Code section 48926. (Priority 9)

Foster youth (for county offices of education only): coordination of services, including working with the county child welfare agency to share information, responding to the needs of the juvenile court system, and ensuring transfer of health and education records. (Priority 10)

B. Pupil Outcomes:

Pupil achievement: performance on standardized tests, score on Academic Performance Index, share of pupils that are college and career ready, share of English learners that become English proficient, English learner reclassification rate, share of pupils that pass Advanced Placement exams with 3 or higher, share of pupils determined prepared for college by the Early Assessment Program. (Priority 4)

Other pupil outcomes: pupil outcomes in the subject areas described in Education Code section 51210 and subdivisions (a) to (i), inclusive, of Education Code section 51220, as applicable. (Priority 8)

C. Engagement:

Parental involvement: efforts to seek parent input in decision making at the district and each school site, promotion of parent participation in programs for unduplicated pupils and special need subgroups. (Priority 3)

Pupil engagement: school attendance rates, chronic absenteeism rates, middle school dropout rates, high school dropout rates, high school graduations rates. (Priority 5)

School climate: pupil suspension rates, pupil expulsion rates, other local measures including surveys of pupils, parents and teachers on the sense of safety and school connectedness. (Priority 6)

Section 1: Stakeholder Engagement

Meaningful engagement of parents, pupils, and other stakeholders, including those representing the subgroups identified in Education Code section 52052, is critical to the LCAP and budget process. Education Code sections 52060(g), 52062 and 52063 specify the minimum requirements for school districts; Education Code sections 52066(g), 52068 and 52069 specify the minimum requirements for county offices of education, and Education Code section 47606.5 specifies the minimum requirements for charter schools. In addition, Education Code section 48985 specifies the requirements.

Instructions: Describe the process used to consult with parents, pupils, school personnel, local bargaining units as applicable, and the community and how this consultation contributed to development of the LCAP or annual update. Note that the LEA's goals, actions, services and expenditures related to the state priority of parental involvement are to be described separately in Section 2. In the annual update boxes, describe the stakeholder involvement process for the review, and describe its impact on, the development of the annual update to LCAP goals, actions, services, and expenditures.

Guiding Questions:

- 1) How have applicable stakeholders (e.g., parents and pupils, including parents of unduplicated pupils and unduplicated pupils identified in Education Code section 42238.01; community members; local bargaining units; LEA personnel; county child welfare agencies; county office of education foster youth services programs, court-appointed special advocates, and other foster youth stakeholders; community organizations representing English learners; and others as appropriate) been engaged and involved in developing, reviewing, and supporting implementation of the LCAP?
- 2) How have stakeholders been included in the LEA's process in a timely manner to allow for engagement in the development of the LCAP?
- 3) What information (e.g., quantitative and qualitative data/metrics) was made available to stakeholders related to the state priorities and used by the LEA to inform the LCAP goal setting process? How was the information made available?
- 4) What changes, if any, were made in the LCAP prior to adoption as a result of written comments or other feedback received by the LEA through any of the LEA's engagement processes?
- 5) What specific actions were taken to meet statutory requirements for stakeholder engagement pursuant to Education Code sections 52062, 52068, and 47606.5, including engagement with representatives of parents and guardians of pupils identified in Education Code section 42238.01?
- 6) What specific actions were taken to consult with pupils to meet the requirements 5 CCR 15495(a)?
- 7) How has stakeholder involvement been continued and supported? How has the involvement of these stakeholders supported improved outcomes for pupils, including unduplicated pupils, related to the state priorities?

Involvement Process for the development of the first LCAP in 2014-15

The Superintendent and Executive Cabinet consulted with a broad range of stakeholders about their priorities during a series of meetings. All parents in the district were invited to attend any of the three parent/community meetings, including parents of children in significant subgroups: African American, Asian, Filipino, Hispanic/Latino, Native Hawaiian/Pacific Islander, White, Socioeconomically Disadvantaged, English Learner, Foster Youth, and Students with Disabilities

- March 20: Local Bargaining Unites TUTA and CSEA (representatives of our teachers and classified staff)
- March 24: Superintendent's Parent Advisory Group, which includes parent representatives from all schools and parents representing unduplicated students
- March 25: Parents and community members at Golden West Middle School
- March 26: Parents and community members at Cambridge Elementary School
- March 27: Administrators
- March 27: Parents and community members at Travis Elementary School
- April 3: Parents of English learners at DELAC (District English Language Advisory Council)

In addition to the opportunities listed above for adults to provide input into LCAP goals and activities, all schools ran student focus groups that included students representing the district's significant subgroups and unduplicated students. It was particularly important to get their input because the plan is intended to improve their academic performance.

After these meetings, a first draft of the LCAP was developed. This draft was published on our website on April 18 for comment and review by all stakeholders. In addition, we took the first draft back to the Superintendent's Parent Advisory Council on April 28 for comment and review, and to DELAC on May 1 for comment and review. The second draft includes revisions from these meetings.

Public hearings on the LCAP and budget were held at the May 13, 2014 Board meeting and the public was provided with an opportunity to comment. At a special Board meeting on June 3, 2014, information about the LCAP was shared and the public was provided with another opportunity to comment. On June 10, 2014, after additional opportunity for public comment, the LCAP and budget were adopted.

Involvement process for Annual Update 2015-16:

To update the LCAP, the Superintendent and Executive Cabinet again consulted with a broad range of stakeholders about their priorities during a series of meetings. All parents in the district were invited to attend any of the three parent/community meetings, including parents of children in significant subgroups: African American, Asian, Filipino, Hispanic/Latino, Native Hawaiian/Pacific Islander, White, Socioeconomically Disadvantaged, English Learner, Foster Youth, and Students with Disabilities.

- January 12: Superintendent's Parent Advisory Group
- January 15: District Administrators and Managers
- January 20: Local Bargaining Units TUTA and CSEA
- January 20: School Site Council Meetings at Foxboro and Travis
- January 20 and 21 (two meetings): Teachers, classified staff, and other school staff
- January 21: Principals
- January 22: District English Learner Advisory Committee (DELAC)
- January 27: Parents and community members at Golden West Middle School
- January 27: School Site Council meetings at Cambridge, Center and Scandia Elementary Schools
- January 28: Parents and community members at Cambridge Elementary School
- January 28: School Site Council Meeting at Golden West
- January 29: Parents and community members at Travis Elementary School
- February 3: Foster Parents
- February 5: Student Focus Group data analysis (Administrators met with student focus groups throughout January and early February)

Impact on LCAP (2014-15)

From the initial meetings, the following LCAP priorities emerged:

- Class size reduction
- Computer science and programming
- CTE in STEM: engineering and robotics, aerospace engineering, and biomedical sciences
- Curriculum and instruction for English learners
- Elementary counseling
- Elementary enrichment programs in music and the arts
- Intervention Specialists for small group support in elementary schools
- K-12 robotics programs
- Keyboarding skills for students
- Professional development
- Reducing bullying and student conflicts on elementary playgrounds
- Socio-emotional learning and character development
- Standards-aligned instructional materials
- Strategic support classes in secondary schools to close skill gaps
- Updating student and staff technology

From the second round of meetings with the Superintendent's Parent Advisory Group and DELAC, the plan was modified by adding details to keyboarding and adding computer programming.

Stakeholder priorities and feedback from the Superintendent's Parent Advisory Group and DELAC led us to modify actions and services and to add actions and services in our first LCAP.

Impact on LCAP for Annual Update 2015-16:

From the stakeholder meetings, the following comments and LCAP priorities emerged and led us to continue current actions and services or to add new actions and services.

- Aeries Analytics to provide data to identify students falling behind
- After school math support for elementary
- Common daily instructional schedules in elementary schools
- Computer programming and keyboarding
- Continue A2A and SART/SARB attendance processes
- Continue to reduce class size in K-3 and Math 7, reduce class sizes in general
- Continue with socio-emotional learning, PBIS, Second Step, and anti-bullying programs
- Credit recovery, ELD, CAHSEE prep summer school for high school students
- Early reading assessments
- Elementary and middle school summer school
- Elementary arts programs
- Elementary music program
- English language development instruction for all English learners
- Enhanced CTE, including Health Sciences, Biotechnology, Aerospace Engineering
- Facilitated PLCs (elementary and secondary English/math)
- Implement READY! for Kindergarten to help families prepare their children for Kindergarten success
- Implement Watch D.O.G.S. program to enhance school safety and provide students with positive male role models
- Important to attract and retain highly qualified teachers
- Improve and better maintain facilities

- February 23: School Site Council Meeting at Vanden
- February 25: School Site Council Meeting at TEC/TCDS (combined SSC)
- March 9: Superintendent's Parent Advisory Group review of first draft
- March 23: District English Learner Advisory Committee (DELAC) review of first draft
- May 12: First public hearing on LCAP and district budget
- June 1: LCAP revisions in response to May Revise reviewed by Superintendent's Parent Advisory Group and DELAC members
- June 9: Second public hearing on revised 2015-18 LCAP and district budget
- June 11: Third public hearing on revised 2015-18 LCAP and district budget
- June 16: Adoption of 2015-18 LCAP and district budget

Student Focus Groups

Each of our 13 school administrators met with one or more student focus groups to find out what was working well for students and what they wanted to see improved. Students were asked open-ended questions appropriate for their grade level, and administrators included unduplicated students and struggling students as part of the sample. Students made positive comments about interventions, and they confirmed what we heard from other stakeholders about the value of STEM, arts, and CTE. Student contributions to priorities are included in the list in the right hand column.

After these meetings, a first draft of the LCAP was developed. We took the first draft back to the Superintendent's Parent Advisory Council on March 9 for comment and review, and to DELAC on March 26 for comment and review. After minor modifications and the addition of budget codes, the draft was posted on the district website on May 5, 2015.

A public hearing on the LCAP and budget was held at the May 12, 2015 Board meeting and the public was provided with an opportunity to comment. Then the Governor's May Revise, released on May 14, 2015, changed the amount of LCFF/SGF funding our district will receive, and in response, we revised the LCAP.

We scheduled an additional meeting for the Superintendent's Parent Advisory Group and DELAC for June 1, but parents were unable to attend. We sent members of both groups an e-mail summarizing changes since the draft they reviewed before the May Revise, and followed up with phone calls where needed. The revised LCAP was posted on the district website on June 2. On June 9, 2015, we held a second public hearing on the revised LCAP and district budget. Due to miscommunication about the hearing date, we held a third public hearing on June 11. On June 16, 2015, the Board adopted the LCAP and district budget.

Involvement process for Annual Update 2016-17:

To update the LCAP, the Superintendent and Executive Cabinet again consulted with a broad range of stakeholders about their priorities during a series of meetings. All parents in the district were invited to attend any of the three parent/community meetings, including parents of children in significant subgroups: African American, Asian, Filipino, Hispanic/Latino, Native Hawaiian/Pacific Islander, White, Socioeconomically Disadvantaged, English Learner, Foster Youth, and Students with Disabilities.

- November 9: Superintendent's Parent Advisory Group LCAP progress report
- January 11: Superintendent's Parent Advisory Group
- January 14: District English Language Advisory Committee (DELAC)
- January 21: Local Bargaining Units TUTA and CSEA
- January 21: Teachers, Classified Staff, and other staff
- January 26: Parents and community members at Cambridge Elementary School
- January 27: Parents and community members at Golden West Middle School
- January 28: Parents and community members at Scandia Elementary School
- February 3: Foster Parents
- February 3: Principals

- Improved high school course access and more elective choices
- Individualized schedules for tutoring for foster children
- Intervention Specialists in elementary schools for ELA and ELD as part of Rtl²
- Keep Aeries gradebooks current and consider expanding use to elementary schools
- Math Lab support classes in secondary schools
- Math pacing guides
- Meet with foster parents to learn more about children's needs, hold welcome meetings for foster children at all schools
- More *Imagine Learning English* software for English learners
- New English language arts and science materials
- Online learning for high school
- Provide counseling and support for elementary students struggling with behavior
- Provide math nights for parents to help them understand the new CA standards and new instructional materials
- Scandia remodel to provide a quieter learning environment by adding walls
- Summer learning opportunities for elementary students
- Teacher training in Kagan cooperative learning, instructional strategies, California standards, new math programs
- Train elementary Special Education Instructional Assistants in the new math program
- Upgrade software and technology equipment
- Vanden 7th period classes to provide the opportunity for to take more classes each year (7 instead of 6)

In addition, we allocated \$4.9 million to fund a list of capital projects in response to priorities expressed by stakeholders related to facilities and safety enhancements.

We took a first draft of the LCAP to the Superintendent's Parent Advisory Group (March 9, 2015) and DELAC (March 26, 2015) to make sure the plan accurately reflected parent priorities. Both groups provided positive feedback about the plan, and no changes were requested. Due to budget changes from the May Revise, we revised the LCAP and the revisions were reviewed by Superintendent's Parent Advisory Group and DELAC members, who expressed support for the plan.

Impact on LCAP for Annual Update 2016-17:

From the stakeholder meetings, the following comments and LCAP priorities emerged, and all of the items below impacted the 2016-19 LCAP. Some of the consultation provided support for current actions and services, which we have therefore continued in next year's LCAP. Other information from consultation led us to include new actions and services to better meet student needs.

- Add four additional workdays for Library Media Technicians for barcoding and materials distribution
- After school math intervention is effective
- All teachers of English language arts will need training in the new materials and time to develop lessons and revise pacing and assessments
- Continue the Vanden Tutoring Center, which got off to a slow start but is working
- Continue the Watch D.O.G.S. program, which is very successful
- Continue to provide designated ELD because it is working
- Continue to provide intervention specialists, and expand this effective program
- Continue to reduce class sizes in Math 7, Math 8, and middle school math support classes
- Continue to reduce elementary class sizes
- Continue with robotics, coding, and engineering programs
- Develop a plan to replace outdated textbooks
- Develop a system to let parents know what online software is available and how to log in

- February 17: Administrators
- February 17: Student Focus Group data analysis (Administrators met with student focus groups throughout January and early February)
- March 11: Foster Parents review of first draft
- March 14: Superintendent's Parent Advisory Group review of first draft
- March 16: District English Learner Advisory Committee (DELAC) review of first draft
- June 14: Public hearing on the LCAP and district budget
- June 28: Adoption of the 2016-19 LCAP and district budget

Student Focus Groups

Each of our 13 school administrators met with one or more student focus groups to find out what was working well for students and what they wanted to see improved. Students were asked open-ended questions appropriate for their grade level, and administrators included unduplicated students and struggling students as part of the sample. Students made positive comments about interventions, and they confirmed what we heard from other stakeholders about the value of STEM, arts, and CTE. There were also multiple comments about how students appreciate their safe schools. Student contributions to priorities are included in the list in the right hand column.

After these meetings, a first draft of the LCAP was developed. We took the first draft back for comment and review to foster parents on March 11, the Superintendent's Parent Advisory Council on March 14, and to DELAC on March 16, 2016. The draft was posted on the district website on May 20, 2016.

A public hearing on the LCAP and budget was held at the June 14, 2016 Board meeting and the public was provided with an opportunity to comment. On June 28, 2016, the Board adopted the LCAP and district budget.

- Elementary and middle school students enjoyed the summer programs and they should be continued
- Elementary teachers would benefit from training in Positive Behavior Interventions & Supports, communicating with parents, and strategies for working with students whose behavior interferes with learning
- Expand Jumpstart Kindergarten because it is very beneficial to incoming Kindergarten students
- Expand Kagan Cooperative Learning training to include days 3, 4, and 5
- Expand the SARB process to provide support to struggling students and families earlier, before there is a major problem
- Expand the social worker program, which directly benefits students and helps them with socio-emotional problems interfering with learning
- It would be helpful to have a bilingual staff member in Student Services
- Keyboarding skills are essential for all students, and taught in elementary school; instruction should be available in middle school also
- Monitor the progress of students attending under special agreements to improve their success when needed
- Music instruction should remain a priority
- Offer college courses on the Vanden campus (dual enrollment program)
- Parent Project needs to be expanded, and more classes should be offered, including within the district
- Parents appreciate the math nights and other curriculum nights and they should be continued and expanded, and held earlier in the year
- PRISM robotics is fun and challenging
- Provide after school tutoring for elementary students in math and other subjects
- Provide an Internship Coordinator to help students find internships and to support student success in internship placements
- Provide Kagan Cooperative Learning training again (days 1 and 2)
- Provide Kagan Win-Win Discipline training for the Golden West staff on release time
- Provide Kagan Win-Win Discipline training to all teachers
- Provide probeware (scientific instrumentation) training for middle school science teachers along with time to develop labs
- Provide TOSA support for beginning teachers
- Provide training to our teacher leaders so that they can train their colleagues
- Reading regrouping helps students
- Reduce barriers to enrollment in Advanced Placement courses and other rigorous courses
- Revise ELA pacing guides for new English language arts materials K-12
- Second Step is helping elementary students deal with bullying
- Send high school teachers to Advanced Placement training
- Summer materials kits were beneficial, and should be expanded to reach students entering K, 1, and 2
- Teachers and support staff need training in de-escalation techniques and active supervision of common areas
- Train Instructional Assistants on working with challenging students with a variety of disabilities
- Translation services need to be expanded because it can be hard to get a translator for a meeting or parent conference
- Use Naviance to help students learn about postsecondary options
- Use the Career Technical Education Incentive Grant to offer Video Production and to purchase equipment for engineering
- We need more Behavior Intervention Specialists so that they have more time to work with challenging students
- We need someone to work with families on attendance problems
- Work with parents to explore possibilities for elementary academic competitions

Section 2: Goals, Actions, Expenditures, and Progress Indicators

Instructions:

All LEAs must complete the LCAP and Annual Update Template each year. The LCAP is a three-year plan for the upcoming school year and the two years that follow. In this way, the program and goals contained in the LCAP align with the term of a school district and county office of education budget and multiyear budget projections. The Annual Update section of the template reviews progress made for each stated goal in the school year that is coming to a close, assesses the effectiveness of actions and services provided, and describes the changes made in the LCAP for the next three years that are based on this review and assessment.

Charter schools may adjust the table below to align with the term of the charter school's budget that is submitted to the school's authorizer pursuant to Education Code section 47604.33.

For school districts, Education Code sections 52060 and 52061, for county offices of education, Education Code sections 52066 and 52067, and for charter schools, Education Code section 47606.5 require(s) the LCAP to include a description of the annual goals, for all pupils and each subgroup of pupils, to be achieved for each state priority as defined in 5 CCR 15495(i) and any local priorities; a description of the specific actions an LEA will take to meet the identified goals; a description of the expenditures required to implement the specific actions; and an annual update to include a review of progress towards the goals and describe any changes to the goals.

To facilitate alignment between the LCAP and school plans, the LCAP shall identify and incorporate school-specific goals related to the state and local priorities from the school plans submitted pursuant to Education Code section 64001. Furthermore, the LCAP should be shared with, and input requested from, school site-level advisory groups, as applicable (e.g., school site councils, English Learner Advisory Councils, pupil advisory groups, etc.) to facilitate alignment between school-site and district-level goals and actions. An LEA may incorporate or reference actions described in other plans that are being undertaken to meet the goal.

Using the following instructions and guiding questions, complete a goal table (see below) for each of the LEA's goals. Duplicate and expand the fields as necessary.

Goal: Describe the goal:

When completing the goal tables, include goals for all pupils and specific goals for school sites and specific subgroups, including pupils with disabilities, both at the LEA level and, where applicable, at the school site level. The LEA may identify which school sites and subgroups have the same goals, and group and describe those goals together. The LEA may also indicate those goals that are not applicable to a specific subgroup or school site.

Related State and/or Local Priorities: Identify the state and/or local priorities addressed by the goal by placing a check mark next to the applicable priority or priorities. The LCAP must include goals that address each of the state priorities, as defined in 5 CCR 15495(i), and any additional local priorities; however, one goal may address multiple priorities.

Identified Need: Describe the need(s) identified by the LEA that this goal addresses, including a description of the supporting data used to identify the need(s).

Schools: Identify the school sites to which the goal applies. LEAs may indicate "all" for all schools, specify an individual school or a subset of schools, or specify grade spans (e.g., all high schools or grades K-5).

Applicable Pupil Subgroups: Identify the pupil subgroups as defined in Education Code section 52052 to which the goal applies, or indicate "all" for all pupils.

Expected Annual Measurable Outcomes: For each LCAP year, identify and describe specific expected measurable outcomes for all pupils using, at minimum, the applicable required metrics for the related state priorities. Where applicable, include descriptions of specific expected measurable outcomes for school sites and specific subgroups, including pupils with disabilities, both at the LEA level and at the school site level.

The metrics used to describe the expected measurable outcomes may be quantitative or qualitative, although the goal tables must address all required metrics for every state priority in each LCAP year. The required metrics are the specified measures and objectives for each state priority as set forth in Education Code sections 52060(d) and 52066(d). For the pupil engagement priority metrics, LEAs must calculate the rates specified in Education Code sections 52060(d)(5)(B), (C), (D) and (E) as described in the Local Control Accountability Plan and Annual Update Template Appendix, sections (a) through (d).

Action/Services: For each LCAP year, identify all annual actions to be performed and services provided to meet the described goal. Actions may describe a group of services that are implemented to achieve the identified goal.

Scope of Service: Describe the scope of each action/service by identifying the school sites covered. LEAs may indicate "all" for all schools, specify an individual school or a subset of schools, or specify grade spans (e.g., all high schools or grades K-5). If supplemental and concentration funds are used to support the action/service, the LEA must identify if the scope of service is districtwide, schoolwide, countywide, or charterwide.

Pupils to be served within identified scope of service: For each action/service, identify the pupils to be served within the identified scope of service. If the action to be performed or the service to be provided is for all pupils, place a check mark next to "ALL."

For each action and/or service to be provided above what is being provided for all pupils, place a check mark next to the applicable unduplicated pupil subgroup(s) and/or other pupil subgroup(s) that will benefit from the additional action, and/or will receive the additional service. Identify, as applicable, additional actions and services for unduplicated pupil subgroup(s) as defined in Education 42238.01, pupils redesignated fluent English proficient, and/or pupils subgroup(s) as defined in Education Code section 52052.

Budgeted Expenditures: For each action/service, list and describe budgeted expenditures for each school year to implement these actions, including where those expenditures can be found in the LEA's budget. The LEA must reference all fund sources for each proposed expenditure. Expenditures must be classified using the California School Accounting Manual as required by Education Code sections 52061, 52067, and 47606.5.

Guiding Questions:

- 1) What are the LEA's goal(s) to address state priorities related to "Conditions of Learning"?
- 2) What are the LEA's goal(s) to address state priorities related to "Pupil Outcomes"?
- 3) What are the LEA's goal(s) to address state priorities related to parent and pupil "Engagement" (e.g., parent involvement, pupil engagement, and school climate)?
- 4) What are the LEA's goal(s) to address any locally-identified priorities?
- 5) How have the unique needs of individual school sites been evaluated to inform the development of meaningful district and/or individual school site goals (e.g., input from site level advisory groups, staff, parents, community, pupils; review of school level plans; in-depth school level data analysis, etc.)?
- 6) What are the unique goals for unduplicated pupils as defined in Education Code sections 42238.01 and subgroups as defined in section 52052 that are different from the LEA's goals for all pupils?
- 7) What are the specific expected measurable outcomes associated with each of the goals annually and over the term of the LCAP?
- 8) What information (e.g., quantitative and qualitative data/metrics) was considered/reviewed to develop goals to address each state or local priority?
- 9) What information was considered/reviewed for individual school sites?
- 10) What information was considered/reviewed for subgroups identified in Education Code section 52052?
- 11) What actions/services will be provided to all pupils, to subgroups of pupils identified pursuant to Education Code section 52052, to specific school sites, to English learners, to low-income pupils, and/or to foster youth to achieve goals identified in the LCAP?
- 12) How do these actions/services link to identified goals and expected measurable outcomes?
- 13) What expenditures support changes to actions/services as a result of the goal identified? Where can these expenditures be found in the LEA's budget?

Notes on Metrics

Metrics marked California are state required metrics that come from the eight state areas of focus. Metrics marked DM (district metric) are Travis Unified metrics that measure what the district considers important beyond the state measures.

California will set performance targets for required metrics before the end of 2016. When that happens, Travis Unified will adopt the required state metrics in place of similar metrics below.

Two types of metrics:

<u>Performance metrics</u> measure the degree to which we are achieving established performance targets. The percentage of students completing the UC a-g college entrance requirements is a performance metric. The percentage of students scoring proficient or above on the Smarter Balanced English language arts assessment is a performance metric. Performance metrics measure achievement on a scale.

<u>Process metrics</u> measure whether we are accomplishing what was planned. Are we meeting benchmarks toward completion of a project? What has been finished? An example of a process metric would be whether we have met with parents to review the LCAP and incorporated parent ideas in the finished product. Another process metric would be whether we held parent math nights. Implementation of state standards is also a process metric. Process metrics measure what was done.

How are the Title I alternative supports required under the federal Every Student Succeeds Act provided to students at Golden West Middle School (the district's only Title I school)?

Academic support

• English language development classes [1.2.7]

Supplemental materials

- READ 180 software and instructional materials [1.2.10]
- Math 180 software and instructional materials (Course I and Course II, which focuses on rate, ratio, percent, functions, equations, and linear relationships to build skills to succeed in Algebra 1,) [1.2.9]

Small group instruction

- Class size reduction in Math 7, Math 7 Lab, Math 8, and Math 8 Lab allows for small group instruction [1.2.9, 1.2.11]
- English language development classes are kept small to allow small group instruction and targeted support (6-11 students in 2015-16) [1.2.7]

Intervention offered during the regular school day

- Math 7 Lab and Math 8 Lab [1.2.9]
- Math 180 Course I and Math 180 Course II [1.2.9]
- READ 180 [1.2.10]

Intervention offered after school

• After school intervention sessions [1.2.8]

What criteria are used to identify eligible students?

Students are eligible if they meet any of the following criteria:

- English learner with overall CELDT score of 1-5
- Scored on the 25th percentile or below (1.5 years below grade level) on the Gates-MacGinitie Reading Test (GMRT) or 30% or below on the math placement assessment
- Scored below Standard Met on the Smarter Balanced English language arts or math assessment
- Ds or Fs in core academic classes
- Foster and homeless students
- Teacher, counselor, parent, or social worker request based on academic performance or support needs

Please see page 23 for details about the Actions and Services related to alternative supports.

	support for accessing California ELA standards.
	2. Invite English learners to elementary summer programs to increase ELA, math, and ELD learning time.
	3. Reach out to parents of elementary English learners to let them know about after school programs including tutoring, Arts Adventures, and STEM programs.
	4. Continue to provide classes for secondary English learners that provide ELD and also support student success in the core academic curriculum and access to
	the California ELA standards.

California Priority 4 Pupil Achievement

4A: The LCAP addresses pupil achievement as measured by statewide assessments.

Performance metric: Spring, 2015 California Assessment of Student Performance and Progress (CAASPP) state assessment results provided a baseline for Smarter Balanced math and ELA assessments. Targets for out years are shown below. We have met the target as a district if the target was met for 17 of the data points below for ELA and math. Because science is in transition, we have met the target for science if all three data points exceed 50.

District Metric 1.1 DM1.1: Participation in professional development activities related to Goal 1.	Process metric: We will collect data about participation in professional development metric is to report on the trainings in the LCAP that were completed this year. We wi those years.			_		•	

District Metric 1.2 Performance metric: 2016-17 is a baseline year for data about the degree to which our CTE pathways align to the California CTE Model Curriculum Standards and DM1.2: The extent to which CTE pathways meet the 10 CTE Program Requirements. The goal is to have all pathways fully aligned, and all program requirements met. Extensive work with community partners align to the California CTE Model and staff outside the pathway is necessary for full implementation of several of these elements, and full implementation will take several years. Curriculum Standards and the 10 CTE Program Requirements. Process metric 2016-17: All pathways will compare their program to the requirements and provide evidence to support their rating of each area. Pathways will select improvement targets and develop action plans for the subsequent years. Performance metric 2017-18: All pathways will score a minimum of a 1 on each element (no zeros), a 2 on element 10, and will have a minimum overall score of 15. Performance metric 2018-19: All pathways will score a minimum of a 1 on each element (no zeros), a 2 on element 10, and will have a minimum overall score of 17. Rating scale 0 = not implemented Name 1 = partially implemented 2 = fully implemented Pathway I Baseline data for 2016-17 1. Offers high quality curriculum and instruction aligned with the California CTE Model Curriculum Standards, including, but not limited to, providing a coherent sequence of CTE courses that enable pupils to transition to postsecondary education programs that lead to a career pathway or attain employment upon graduation from high school. 2. Provides pupils with quality career exploration and guidance. 3. Provides pupil support services, including counseling and leadership development. 4. Provides for system alignment, coherence, and articulation, including ongoing and structural regional or local partnerships with postsecondary educational institutions, with documented formal written agreements. 5. Forms ongoing and structural industry and labor partnerships, documented through formal written agreements and through participation on advisory committees. 6. Provides opportunities for pupils to participate in after school, extended day, and out-of-school internships, competitions, and other work-based learning opportunities. 7. Reflects regional or local labor market demands and focuses on current or emerging high-skill, high-wage, or high-demand occupations. 8. Leads to an industry-recognized credential or certificate or appropriate postsecondary training or employment. 9. Is staffed by skilled teachers (CTE credentialed teachers) or faculty and provides professional development opportunities for those teachers or faculty members. 10. Reports data to allow for an evaluation of the program.

District Metric 1.3

DM1.3: The percent of students who have successfully (with an A, B, or C grade) completed Algebra 1 by the end of 9th grade.

Algebra 1 success rates are a strong leading indicator for UC a-g college entrance requirements completion. The data below is for students who were in 9th grade in 2014-15. Some students completed Algebra 1 in 8th grade, and some completed Algebra 1 in 9th grade. The chart below shows the relationship between the percentage of students who enroll in a course and the percentage that complete it with an A, B, or C. If the bars have the same length, all students enrolled earned an A, B, or C. Where the bars have very different lengths, significant percentages of students earned Ds or Fs. This data should be interpreted with an understanding that some subgroups are very small, and others are much larger. We have met the target if 12 of the data points in the chart met the target.

	manager of elementary afternoon and summer programs. Provide late afternoon bus service for Center and Travis to ensure all students can access tutoring and other after school programs.
1.2.4	Increase and improve ELD services by providing elementary English learners with a minimum of 150 minutes of designated ELD per week, integrated ELD during ELA lessons, and access to software and other specialized learning materials to improve their mastery of ELD and ELA standards.
1.2.5	Support student success at the beginning of Kindergarten by providing additional learning time during summer Jumpstart Kindergarten programs for incoming Kindergarten students who have not had a preschool experience or who would benefit from the program, with 2 classes at Travis and 3 classes at Foxboro in Summer, 2016.
Class si	ze reduction
1.2.6	Increase teacher time with individual students and small groups by reducing class size to an average of 24:1 across all TK-3 classes in each elementary school to improve student learning and success.
<u>Middle</u> Learnin	School g support
1.2.7	Increase and improve services to English learners by providing instructional materials and 3 sections (0.50 FTE) of designated ELD classes (minimum of 220 minutes per week) at Golden West to improve student mastery of ELD and ELA standards.
1.2.8	Provide student tutors for middle school foster and homeless children and work with foster families to meet their unique scheduling needs. Provide after school intervention sessions for eligible students.
1.2.9	Increase learning time by providing concurrent Math 7 Lab and Math 8 Lab classes for students performing below expected levels in math, and improve instruction for students performing significantly below grade level by providing Math 180 classes.
1.2.10	Increase learning time and improve the quality of reading instruction by providing <i>READ 180</i> for students performing below expected levels in reading.
Class si	ze reduction
1.2.11	Increase teacher time with individual students and small groups by reducing class size in Math 7, Math 8, and in math support classes to improve student learning and success.
High So	hool
Learnin	g support
1.2.12	Increase learning time and improve services to students performing below expected levels in math by providing math lab classes.
1.2.13	Increase and improve services to English learners by providing 2 sections (0.40 FTE) of designated ELD classes (minimum of 220 minutes per week) at Vanden to improve student mastery of ELD and ELA standards. Provide laptop computers to support student learning.
1.2.14	Increase learning time through the Vanden Tutoring Center, which will operate four days a week (M-Th) before school and after 6 th and 7 th periods to provide a flexible schedule to help students with math, ELD, and other core subjects.
Class si	ze reduction
1.2.15	Increase teacher time with individual students and small groups by maintaining low class sizes in English 1, Algebra 1, and support classes to improve student learning and success.

1.3 Develop systems to ensure all students graduate prepared for college and career.

1.3.1	Increase the graduation rate and improve student academic performance by providing high school summer school for ELD and credit recovery.	
1.3.2	Increase the graduation rate and improve student academic performance by providing online learning courses for high school credit recovery.	
1.3.3	Improve CTE programs by aligning pathways to the California CTE Model Curriculum Standards so that all pathways meet the 10 CTE program requirements, which will enable pupils to attain employment upon graduation from high school and to transition to postsecondary education programs that lead to a career. Improve the quality of CTE programs by using CTEIG funds to purchase equipment for programs that are aligned to standards.	
1.3.4	Expand student CTE options by offering new Biotechnology I, Video Production, and Medical Science II CTE courses. Increase internship opportunities and improve their quality through collaboration with SCOE to provide a 0.50 FTE Internship Coordinator to develop internship opportunities and to place and monitor student interns.	
1.3.5	Improve access to UC a-g courses, credit recovery, STEM, music, arts, and CTE by providing Vanden students with the opportunity to take 7 classes.	
1.3.6	Increase enrollment in our most rigorous course offerings by reducing enrollment barriers and providing increased support for students.	
1.3.7	Expand and improve the guidance curriculum offered to secondary students by providing Naviance for college and career planning in middle and high schools to help align student interests and strengths to post-secondary goals in order to improve student outcomes. Plan visits to colleges and other post-secondary education options. Ensure all secondary students are familiar with University of California and California State University admission requirements.	
1.3.8	Increase and improve opportunities for high school students to earn college credit from Solano Community College through articulation agreements and the dual enrollment program.	
1.3.9	Improve the instructional program and school connectedness in grades 6-9 through the work of a Middle Grades Transition Task Force that will study best practices for middle grades students and make recommendations about how we might improve our programs.	

	-	LCAP Year 2: 2017-18
Expected	Measurable Outcome Targets for LCAP Goal 1	: Narrow the achievement gap while improving academic achievement for all students. Provide students with equitable access to rigorous, standards-
Annual		based core curriculum and quality Career Technical Education (CTE). Ensure that all students graduate.
Measurable	Metrics	Measureable outcomes
Outcomes:	California Priority 2 State Standards2A: The LCAP addresses the implementation of state board adopted academic content	Performance metric 2017-18, 2018-19, and 2019-20 1. Continue to provide 100% of students with access to a broad courses of study as required in Education Code §51210 and §51220(a-i).
	and performance standards for all students.	Process metrics 2017-18 1. Select instructional materials aligned to the California Next Generation Science Standards for K-12.
		Process metrics 2018-19 1. Implement new K-12 science curriculum aligned to California's Next Generation Science Standards.
		Process metrics 2019-20
	California Drianita 2 Chata Chandanda	1. Focus on implementation of California's Social Science Standards.
	California Priority 2 State Standards 2B: The LCAP addresses how the programs	Performance metrics for English learners may be found in 4D and 4E (for 2017-18, 2018-19, and 2019-20)
	and services will enable English learners to access the CCSS and the ELD standards for purposes of gaining academic content knowledge and English language proficiency.	 All elementary English learners receive a minimum of 150 minutes per week of ELD instruction that includes the ELD standards and support for accessing California ELA standards. All secondary English learners receive a minimum of 220 minutes per week of ELD instruction that includes the ELD standards and support for accessing California ELA standards. Invite English learners to elementary summer programs to increase ELA, math, and ELD learning time. Reach out to parents of elementary English learners to let them know about after school programs including tutoring, Arts Adventures, and STEM programs. Continue to provide classes for secondary English learners that provide ELD and also support student success in the core academic curriculum and access to the California ELA standards.

California Priority 4 Pupil Achievement

4A: The LCAP addresses pupil achievement as measured by statewide assessments.

Performance metric: Spring, 2015 California Assessment of Student Performance and Progress (CAASPP) state assessment results provided a baseline for Smarter Balanced math and ELA assessments. Targets for out years are shown below. We have met the target as a district if the target was met for 17 of the data points below for ELA and math. Because science is in transition, we have met the target for science if all three data points exceed 50.

CAASPP (Smarter Balanced) English Language Arts targets for 2017-18, 2018-19, and 2019-20

Numbers show the percentage of students scoring Standard Met or Standard Exceeded.

California Priority 7 Course Access	Performance metric for 2017-18, 2018-19, 2019-20: Continue to provide 100% of students with access to a broad courses of study as required in Education Code
7A: The LCAP addresses the extent to which pupils have access to and are enrolled in	§51210 and §51220(a-i).
courses described under Sections 51210 and 51220(a)-(i), as applicable.	Process metric 2016-17: Analyze barriers to enrollment in AP and other rigorous courses and develop a plan to remove these barriers to meet the timelines below.
	Process metric 2017-18: Begin to remove barriers to enrollment in AP and other rigorous courses for students registering for the 2018-19 school year.
	Process metric for 2018-19: Barriers to enrollment in AP and other rigorous courses have been removed.
	Process metric for 2019-20: Barriers to enrollment in AP and other rigorous courses have been removed.

California Priority 7 Course Access

7B: The LCAP addresses the extent to which pupils have access to and are enrolled in programs and services developed and provided to unduplicated pupils.

Process metric for 2016-17: Establish baseline data for participation in programs and services for unduplicated pupils as shown in the chart below. During 2015-16, we had 156 unduplicated students participating in Arts Adventures classes, but we did not measure participation in the other programs and services on the list.

Performance metric for 2017-18: Increase the number/percent of unduplicated students participating in programs and services appropriate for their needs. (An unduplicated student reading above grade level expectations would not receive intensive reading support, but a struggling student should.) Numerical targets will be established in 2016-17.

Performance metric for 2018-19: Increase the number/percent of unduplicated students participating in programs and services appropriate for their needs. (An unduplicated student reading above grade level expectations would not receive intensive reading support, but a struggling student should.) Numerical targets will be established in 2016-17.

Performance metric for 2019-20: Increase the number/percent of unduplicated students participating in programs and services appropriate for their needs. (An unduplicated student reading above grade level expectations would not receive intensive reading support, but a struggling student should.) Numerical targets will be established in 2016-17.

	1. Offers high quality curriculum and instruction aligned with the California CTE								
	Model Curriculum Standards, including, but not limited to, providing a coherent								
	sequence of CTE courses that enable pupils to transition to postsecondary								
	education programs that lead to a career pathway or attain employment upon								
	graduation from high school. 2. Provides pupils with quality career exploration and guidance.								
	Provides pupil support services, including counseling and leadership								
	development.								
	4. Provides for system alignment, coherence, and articulation, including ongoing								
	and structural regional or local partnerships with postsecondary educational								
	institutions, with documented formal written agreements.								
	5. Forms ongoing and structural industry and labor partnerships, documented								
	through formal written agreements and through participation on advisory committees.								
	6. Provides opportunities for pupils to participate in after school, extended day,						+ +		
	and out-of-school internships, competitions, and other work-based learning								
	opportunities.								
	7. Reflects regional or local labor market demands and focuses on current or								
	emerging high-skill, high-wage, or high-demand occupations.								
	8. Leads to an industry-recognized credential or certificate or appropriate								
	postsecondary training or employment.								
	9. Is staffed by skilled teachers (CTE credentialed teachers) or faculty and								
	provides professional development opportunities for those teachers or faculty members.								
	10. Reports data to allow for an evaluation of the program.						+ + +		
	profite data to district an evaluation of the problem.								

District Metric 1.3

DM1.3: The percent of students who have successfully (with an A, B, or C grade) completed Algebra 1 by the end of 9th grade.

Algebra 1 success rates are a strong leading indicator for UC a-g college entrance requirements completion. The data below is for students who were in 9th grade in 2014-15. Some students completed Algebra 1 in 8th grade, and some completed Algebra 1 in 9th grade. The chart below shows the relationship between the percentage of students who enroll in a course and the percentage that complete it with an A, B, or C. If the bars have the same length, all students enrolled earned an A, B, or C. Where the bars have very different lengths, significant percentages of students earned Ds or Fs. This data should be interpreted with an understanding that some subgroups are very small, and others are much larger. We have met the target if 12 of the data points in the chart met the target.

S F	upport increase and improve services to English learners and students not meeting expectations in reading by providing Intervention pecialists to support RtI ² in elementary schools, with 1.0 FTE at Scandia and Travis and 2.0 FTE at Cambridge, Center, and oxboro where there are larger numbers of children needing ELD instruction. Provide instructional materials, technology, and ther tools needed for effective intervention, both for Intervention Specialists and for classroom teachers.			6000 = Capital Outlay 7000 = Other Outgo	
	nprove our ability to provide timely support to students not making adequate progress in reading through the use of nonitoring assessments that identify students who need additional support.				
p h	ncrease learning time by providing a Tutoring Center (M, Tu, Th for one hour) to support English learners and students erforming below expectations in ELA and math. Provide student tutors for the Tutoring Center and elementary foster and omeless children, working with foster families to meet their unique scheduling needs. Assign a district administrator as the nanager of elementary afternoon and summer programs. Provide late afternoon bus service for Center and Travis to ensure				

	all students can access tutoring and other after school programs.	
1.2.4	Increase and improve ELD services by providing elementary English learners with a minimum of 150 minutes of designated ELD per week, integrated ELD during ELA lessons, and access to software and other specialized learning materials to improve their mastery of ELD and ELA standards.	
1.2.5	Support student success at the beginning of Kindergarten by providing additional learning time during summer Jumpstart Kindergarten programs for incoming Kindergarten students who have not had a preschool experience or who would benefit from the program, with 2 classes at Travis and 3 classes at Foxboro in Summer, 2016.	
Class s 1.2.6	ize reduction Increase teacher time with individual students and small groups by reducing class size to an average of 24:1 across all TK-3 classes in each elementary school to improve student learning and success.	
	s School ng support	
1.2.7	Increase and improve services to English learners by providing instructional materials and 3 sections (0.50 FTE) of designated ELD classes (minimum of 220 minutes per week) at Golden West to improve student mastery of ELD and ELA standards.	
1.2.8	Provide student tutors for middle school foster and homeless children and work with foster families to meet their unique scheduling needs. Provide after school intervention sessions for eligible students.	
1.2.9	Increase learning time by providing concurrent Math 7 Lab and Math 8 Lab classes for students performing below expected levels in math, and improve instruction for students performing significantly below grade level by providing Math 180 classes.	
1.2.10	Increase learning time and improve the quality of reading instruction by providing <i>READ 180</i> for students performing below expected levels in reading.	
	ize reduction Increase teacher time with individual students and small groups by reducing class size in Math 7, Math 8, and in math support classes to improve student learning and success.	
High S		
	ng support Increase learning time and improve services to students performing below expected levels in math by providing math lab classes.	
1.2.13	Increase and improve services to English learners by providing 2 sections (0.40 FTE) of designated ELD classes (minimum of 220 minutes per week) at Vanden to improve student mastery of ELD and ELA standards. Provide laptop computers to support student learning.	
1.2.14	Increase learning time through the Vanden Tutoring Center, which will operate four days a week (M-Th) before school and after 6 th and 7 th periods to provide a flexible schedule to help students with math, ELD, and other core subjects.	
	ize reduction Increase teacher time with individual students and small groups by maintaining low class sizes in English 1, Algebra 1, and support classes to improve student learning and success.	

1.3 Develop systems to ensure all students graduate prepared for college and career.

1.3.1	Increase the graduation rate and improve student academic performance by providing high school summer school for ELD and credit recovery.	
1.3.2	Increase the graduation rate and improve student academic performance by providing online learning courses for high school credit recovery.	
1.3.3	Improve CTE programs by aligning pathways to the California CTE Model Curriculum Standards so that all pathways meet the 10 CTE program requirements, which will enable pupils to attain employment upon graduation from high school and to transition to postsecondary education programs that lead to a career. Improve the quality of CTE programs by using CTEIG funds to purchase equipment for programs that are aligned to standards.	
1.3.4	Expand student CTE options by offering new CTE courses. Increase internship opportunities and improve their quality through collaboration with SCOE to provide a 0.50 FTE Internship Coordinator to develop internship opportunities and to place and monitor student interns.	
1.3.5	Improve access to UC a-g courses, credit recovery, STEM, music, arts, and CTE by providing Vanden students with the opportunity to take 7 classes.	
1.3.6	Increase enrollment in our most rigorous course offerings by reducing enrollment barriers and providing increased support for students.	
1.3.7	Expand and improve the guidance curriculum offered to secondary students by providing Naviance for college and career planning in middle and high schools to help align student interests and strengths to post-secondary goals in order to improve student outcomes. Plan visits to colleges and other post-secondary education options. Ensure all secondary students are familiar with University of California and California State University admission requirements.	
1.3.8	Increase and improve opportunities for high school students to earn college credit from Solano Community College through articulation agreements and the dual enrollment program.	

		LCAP Year 3: 2018-19
Expected	Measurable Outcome Targets for LCAP Goal 1	: Narrow the achievement gap while improving academic achievement for all students. Provide students with equitable access to rigorous, standards-
Annual		based core curriculum and quality Career Technical Education (CTE). Ensure that all students graduate.
Measurable	Metrics	Measureable outcomes
Outcomes:	California Priority 2 State Standards 2A: The LCAP addresses the implementation of state board adopted academic content	Performance metric 2018-19, 2019-20, and 2020-21 1. Continue to provide 100% of students with access to a broad courses of study as required in Education Code §51210 and §51220(a-i). Process metrics 2018-10.
	and performance standards for all students.	Process metrics 2018-19 1. Implement new K-12 science curriculum aligned to California's Next Generation Science Standards.
		Process metrics 2019-20
		1. Focus on implementation of California's Social Science Standards.
		Process metrics 2020-21
		1. Focus on implementation of California's Social Science Standards.
	California Priority 2 State Standards 2B: The LCAP addresses how the programs	Performance metrics for English learners may be found in 4D and 4E (for 2018-19, 2019-20, and 2020-21)
	and services will enable English learners to	Process metrics 2018-19
	access the CCSS and the ELD standards for purposes of gaining academic content knowledge and English language proficiency.	 All elementary English learners receive a minimum of 150 minutes per week of ELD instruction that includes the ELD standards and support for accessing California ELA standards. All secondary English learners receive a minimum of 220 minutes per week of ELD instruction that includes the ELD standards and support for accessing California ELA standards. Invite English learners to elementary summer programs to increase ELA, math, and ELD learning time.
	pronciency.	 Reach out to parents of elementary English learners to let them know about after school programs including tutoring, Arts Adventures, and STEM programs. Continue to provide classes for secondary English learners that provide ELD and also support student success in the core academic curriculum and access to the California ELA standards.
		Process metrics 2019-20
		 All elementary English learners receive a minimum of 150 minutes per week of ELD instruction that includes the ELD standards and support for accessing California ELA standards. All secondary English learners receive a minimum of 220 minutes per week of ELD instruction that includes the ELD standards and support for accessing California ELA standards.
		 Invite English learners to elementary summer programs to increase ELA, math, and ELD learning time. 		the California ELA standards.

California Priority 4 Pupil Achievement

4A: The LCAP addresses pupil achievement as measured by statewide assessments.

Performance metric: Spring, 2015 California Assessment of Student Performance and Progress (CAASPP) state assessment results provided a baseline for Smarter Balanced math and ELA assessments. Targets for out years are shown below. We have met the target as a district if the target was met for 17 of the data points below for ELA and math. Because science is in transition, we have met the target for science if all three data points exceed 50.

California Priority 7 Course Access

7B: The LCAP addresses the extent to which pupils have access to and are enrolled in programs and services developed and provided to unduplicated pupils.

Process metric for 2016-17: Establish baseline data for participation in programs and services for unduplicated pupils as shown in the chart below. During 2015-16, we had 156 unduplicated students participating in Arts Adventures classes, but we did not measure participation in the other programs and services on the list.

Performance metric for 2017-18: Increase the number/percent of unduplicated students participating in programs and services appropriate for their needs. (An unduplicated student reading above grade level expectations would not receive intensive reading support, but a struggling student should.) Numerical targets will be established in 2016-17.

Performance metric for 2018-19: Increase the number/percent of unduplicated students participating in programs and services appropriate for their needs. (An unduplicated student reading above grade level expectations would not receive intensive reading support, but a struggling student should.) Numerical targets will be established in 2016-17.

Performance metric for 2019-20: Increase the number/percent of unduplicated students participating in programs and services appropriate for their needs. (An unduplicated student reading above grade level expectations would not receive intensive reading support, but a struggling student should.) Numerical targets will be established in 2016-17.

Performance metric for 2020-21: Increase the number/percent of unduplicated students participating in programs and services appropriate for their needs. (An unduplicated student reading above grade level expectations would not receive intensive reading support, but a struggling student should.) Numerical targets will be established in 2016-17.

	1. Offers high quality curriculum and instruction aligned with the California CTE Model Curriculum Standards, including, but not limited to, providing a coherent sequence of CTE courses that enable pupils to transition to postsecondary education programs that lead to a career pathway or attain employment upon graduation from high school.							
	Provides pupils with quality career exploration and guidance. Provides pupil support services, including counseling and leadership							
	 development. 4. Provides for system alignment, coherence, and articulation, including ongoing and structural regional or local partnerships with postsecondary educational institutions, with documented formal written agreements. 5. Forms ongoing and structural industry and labor partnerships, documented through formal written agreements and through participation on advisory 							
	committees. 6. Provides opportunities for pupils to participate in after school, extended day, and out-of-school internships, competitions, and other work-based learning opportunities.							
	 7. Reflects regional or local labor market demands and focuses on current or emerging high-skill, high-wage, or high-demand occupations. 8. Leads to an industry-recognized credential or certificate or appropriate postsecondary training or employment. 							
	 9. Is staffed by skilled teachers (CTE credentialed teachers) or faculty and provides professional development opportunities for those teachers or faculty members. 10. Reports data to allow for an evaluation of the program. 							
	1 20. Reports data to allow for all evaluation of the program.							

District Metric 1.3

DM1.3: The percent of students who have successfully (with an A, B, or C grade) completed Algebra 1 by the end of 9th grade.

Algebra 1 success rates are a strong leading indicator for UC a-g college entrance requirements completion. The data below is for students who were in 9th grade in 2014-15. Some students completed Algebra 1 in 8th grade, and some completed Algebra 1 in 9th grade. The chart below shows the relationship between the percentage of students who enroll in a course and the percentage that complete it with an A, B, or C. If the bars have the same length, all students enrolled earned an A, B, or C. Where the bars have very different lengths, significant percentages of students earned Ds or Fs. This data should be interpreted with an understanding that some subgroups are very small, and others are much larger. We have met the target if 12 of the data points in the chart met the target.

	ary <u>Schools</u> g support			Operating Expenses
_	Increase and improve services to English learners and students not meeting expectations in reading by providing Intervention Specialists to support Rtl ² in elementary schools, with 1.0 FTE at Scandia and Travis and 2.0 FTE at Cambridge, Center, and Foxboro where there are larger numbers of children needing ELD instruction. Provide instructional materials, technology, and other tools needed for effective intervention, both for Intervention Specialists and for classroom teachers.			6000 = Capital Outlay 7000 = Other Outgo
1.2.2	Improve our ability to provide timely support to students not making adequate progress in reading through the use of monitoring assessments that identify students who need additional support.			
1.2.3	Increase learning time by providing a Tutoring Center (M, Tu, Th for one hour) to support English learners and students performing below expectations in ELA and math. Provide student tutors for the Tutoring Center and elementary foster and homeless children, working with foster families to meet their unique scheduling needs. Assign a district administrator as the manager of elementary afternoon and summer programs. Provide late afternoon bus service for Center and Travis to ensure			

	all students can access tutoring and other after school programs.	
1.2.4	Increase and improve ELD services by providing elementary English learners with a minimum of 150 minutes of designated ELD per week, integrated ELD during ELA lessons, and access to software and other specialized learning materials to improve their mastery of ELD and ELA standards.	
1.2.5	Support student success at the beginning of Kindergarten by providing additional learning time during summer Jumpstart Kindergarten programs for incoming Kindergarten students who have not had a preschool experience or who would benefit from the program, with 2 classes at Travis and 3 classes at Foxboro in Summer, 2016.	
Class s 1.2.6	ize reduction Increase teacher time with individual students and small groups by reducing class size to an average of 24:1 across all TK-3 classes in each elementary school to improve student learning and success.	
	School ng support	
1.2.7	Increase and improve services to English learners by providing instructional materials and 3 sections (0.50 FTE) of designated ELD classes (minimum of 220 minutes per week) at Golden West to improve student mastery of ELD and ELA standards.	
1.2.8	Provide student tutors for middle school foster and homeless children and work with foster families to meet their unique scheduling needs. Provide after school intervention sessions for eligible students.	
1.2.9	Increase learning time by providing concurrent Math 7 Lab and Math 8 Lab classes for students performing below expected levels in math, and improve instruction for students performing significantly below grade level by providing Math 180 classes.	
1.2.10	Increase learning time and improve the quality of reading instruction by providing <i>READ 180</i> for students performing below expected levels in reading.	
	ize reduction Increase teacher time with individual students and small groups by reducing class size in Math 7, Math 8, and in math support classes to improve student learning and success.	
High S		
	ng support Increase learning time and improve services to students performing below expected levels in math by providing math lab classes.	
1.2.13	Increase and improve services to English learners by providing 2 sections (0.40 FTE) of designated ELD classes (minimum of 220 minutes per week) at Vanden to improve student mastery of ELD and ELA standards. Provide laptop computers to support student learning.	
1.2.14	Increase learning time through the Vanden Tutoring Center, which will operate four days a week (M-Th) before school and after 6 th and 7 th periods to provide a flexible schedule to help students with math, ELD, and other core subjects.	
	ize reduction Increase teacher time with individual students and small groups by maintaining low class sizes in English 1, Algebra 1, and support classes to improve student learning and success.	

1.3 Develop systems to ensure all students graduate prepared for college and career.

1		 T
1.3.1	Increase the graduation rate and improve student academic performance by providing high school summer school for ELD and credit recovery.	
1.3.2	Increase the graduation rate and improve student academic performance by providing online learning courses for high school credit recovery.	
1.3.3	Improve CTE programs by aligning pathways to the California CTE Model Curriculum Standards so that all pathways meet the 10 CTE program requirements, which will enable pupils to attain employment upon graduation from high school and to transition to postsecondary education programs that lead to a career. Improve the quality of CTE programs by using CTEIG funds to purchase equipment for programs that are aligned to standards.	
1.3.4	Expand student CTE options by offering new CTE courses. Increase internship opportunities and improve their quality through collaboration with SCOE to provide a 0.50 FTE Internship Coordinator to develop internship opportunities and to place and monitor student interns.	
1.3.5	Improve access to UC a-g courses, credit recovery, STEM, music, arts, and CTE by providing Vanden students with the opportunity to take 7 classes.	
1.3.6	Increase enrollment in our most rigorous course offerings by reducing enrollment barriers and providing increased support for students.	
1.3.7	Expand and improve the guidance curriculum offered to secondary students by providing Naviance for college and career planning in middle and high schools to help align student interests and strengths to post-secondary goals in order to improve student outcomes. Plan visits to colleges and other post-secondary education options. Ensure all secondary students are familiar with University of California and California State University admission requirements.	
1.3.8	Increase and improve opportunities for high school students to earn college credit from Solano Community College through articulation agreements and the dual enrollment program.	

ted	ovide positive, nurturing school environments enriched by experiences in the arts, music, STEM (science, chnology, engineering, and mathematics) where students feel safe, welcome, and connected to the school mmunity. Extend learning beyond the school day.	Related State and/or Local Priorities: 1
Identified Need :	Attendance data, suspension data, and California Healthy Kids Survey data show that we can make improvements in students and the graduation rate from Independent Study is low. Although we are seeing improvements in the graduation rate of low and the graduation rate from Independent Study is low. Although we are seeing improvements in the graduation rate of low attendance challenges are at both ends of the TK-12 grade range. 22.0% of our TK students are chronically absent, absences impact children's ability to learn to read because instead of getting a carefully planned scope and sequence of Some of these children are most in need of daily instruction and additional daily intervention. The chronic absentee rate creeps up again near the end of high school. 9.3% of 11th grade students and 10.5% of 12th grade school get behind and may give up. Our theory of action is that when we provide rich, engaging learning activities both during and outside the school day (aft academically. In addition, we have some students who need extra socio-emotional support and a few students who need such as the 11.4% suspension rate at Golden West. All of these identified needs led us to develop LCAP Goal 2. The data below shows the number of disciplinary incidents for all students during the 2015-16 school year through 4.28.1 State Metric 5A and 5B. Detailed discipline data is shown in State Metric 6A, and California Healthy Kids Survey data can be such as the 11.4% suspension rate at Solden West. All of these identified needs led us to develop LCAP Goal 2.	ullied at school. Students with disabilities have a lower graduation rate than most other groups, English learners and students in alternative education, we still have work to do in this area. t. 6.9% of Kindergarten students and 4.3% of first graders are chronically absent. These f reading instruction, students get random lessons depending in which days they are at school. grade students are chronically absent. This can impact graduation because students who miss fter school and summer), students feel more connected to school and are more likely to succeed and intensive socio-emotional support as evidenced by suspension rates and other discipline data, 16. The top three violations are related to attendance. Detailed attendance data is shown in

I	California Priority 6 School Climate
	6A: The LCAP addresses school
	climate as measured by pupil
I	suspension rates.

Where suspension rates are 4.5% or above, we have set targets for reductions. Focusing on grade levels and subgroups with higher suspension rates will allow us to target our suspension reduction efforts to areas where improvement is needed most. Should other groups rise above 4.5% in future years, we will add additional reduction targets. We have met the target if 30 of the data points below met the target.

Tenth Grade	21	4.6	4.3	4.1	3.9
Eleventh Grade	16	3.9			
Twelfth Grade	15	3.7			

An analysis of this data does not show disproportionality, where students are suspended at percentages in significant excess of their numbers in the population. Where the subgroup includes fewer than 50 students, what appears to be disproportionality is likely to be statistical drift, where a single suspension in a small group significantly raises the percentage.

Suspension rates are a useful leading performance indicator to identify areas for focus. The chart above helps us to identify the grade levels where suspension data indicates students are not thriving. Suspension is likely to be an indicator of academic and socio-emotional problems.

<u>Second</u> 2.2.6	Develop plans for initial stages of PBIS implementation.			
2.2.7	Select and implement a cyberbullying program.			
2.2.8	Increase and improve Tier II PBIS services, including individual counseling, support groups, and work with families by providing 2.0 FTE School Social Workers plus Social Worker Interns. Increase and improve services to students needing Tier III behavior support by providing three Behavior Teams (a Behavior			
3	Intervention Specialist teamed with a Behavior Assistant) to support both Special Education students and students in the general program.			

2.2.10	Increase options for students by providing alternate learning locations where middle school students needing to improve their behavior can regain their self-control in a quiet environment and use their time productively to complete classwork.	
2.2.11	Use enhanced SART/SST/SARB processes to address attendance, academic performance, and behavioral issues. Implement an annual progress and performance review process for students attending under special agreements.	
2.2.12	Provide a shared 0.60 FTE bilingual (in Spanish) Parent Liaison to increase communication between families and schools, promote regular school attendance, and connect families to needed resources.	
2.2.13	Implement Student2Student program to provide students with strong connections to school, to each other, and to the community.	
2.3 Pr	ovide enrichment and hands-on learning in the arts, music, and STEM (science, technology, engineering, and	
m	thematics) to improve academic achievement and enhance socio-emotional wellness.	
2.3.1	Expand learning and increase connectedness to school through STEM-themed summer day camp programs with embedded	
	ELA and math skill development for elementary students. Establish a process for priority registration for unduplicated pupils	
	while also including additional students to create heterogeneous learning environments.	
2.3.2	Enhance learning through an engaging, themed middle school summer program that enhances belonging, builds motivation,	
2.3.2	and provides instruction to close learning gaps in ELA and math to prepare students for success in the following school year.	
	and provides instruction to close rearring gaps in 22 valid matrix to prepare stadents for success in the following school year.	
2.3.3	Increase learning time by providing elementary after school enrichment mini-courses including Arts Adventures, STEM classes,	
	and competitive robotics. The mini-courses use engaging context to teach ELA and math skills as well as art, science, and	
	engineering.	
2.3.4	Provide music instruction in elementary schools by providing general music for all 4 th grade students and a choice of general	
2.3.4	music or elective band for 5 th and 6 th grade students.	
2.3.5	Support after school K-8 competitive robotics.	
2.3.6	Increase the time available to learn keyboarding in elementary schools through an online program that can be used at school	
	or at home.	
2.3.7	Teach programming and robotics within the school day using resources including Code.org and the PRISM program from the	
2.5.,	UC Davis C-STEM Center. Enlist teachers with expertise to design lessons and train others.

California Priority 6 School Climate
6A: The LCAP addresses school
climate as measured by pupil
suspension rates.

Where suspension rates are 4.5% or above, we have set targets for reductions. Focusing on grade levels and subgroups with higher suspension rates will allow us to target our suspension reduction efforts to areas where improvement is needed most. Should other groups rise above 4.5% in future years, we will add additional reduction targets. We have met the target if 30 of the data points below met the target.

		<u> </u>

California Priority 6 School Climate	
6A: The LCAP addresses school	
climate as measured by pupil	
suspension rates.	

Where suspension rates are 4.5% or above, we have set targets for reductions. Focusing on grade levels and subgroups with higher suspension rates will allow us to target our suspension reduction efforts to areas where improvement is needed most. Should other groups rise above 4.5% in future years, we will add additional reduction targets. We have met the target if 30 of the data points below met the target.

		ı	ı	1	1

	An analysis of this data does not show dis subgroup includes fewer than 50 student percentage.																
alifornia Priority 6 School Climate B: The LCAP addresses school climate as measured by pupil expulsion rates.	Travis Unified has a historically low expulsion rate. Our target is to maintain the expulsion rate below 1%. Target for 2018-19: Maintain expulsion rate below 1%. Target for 2019-20: Maintain expulsion rate below 1%. Target for 2020-21: Maintain expulsion rate below 1%.																
California Priority 6 School Climate	We are using the California Healthy Kids	survey to m	onitor th	ne degre	e to whi	ch our w	ork to ir	nprove s	school cl	imate is	effectiv	e.

Performance metric for 2019-20: 100% of students have textbooks and instructional materials as required by the Williams Act.									
Expected Annual	California Priority 1 Basic 1C: The LCAP addresses the degree to which school facilities are maintained in good repair.	Each year, the condition of each of our schools is evaluated using the Facilities Inspection Tool (FIT). The FIT is a rubric for eight areas of facility condition including systems, interior, exterior, cleanliness, electrical, restrooms and drinking fountains, safety, and structural conditions. 64 data points are developed: eight conditions for each of our eight school facilities. 2014-15 provided a baseline year for FIT data, and we established an LCAP target of an increase of 1% per year. In 2014-15, we had 52 of 64 areas rated Good or Excellent, which was 81%.

Annual Update

Annual Update Instructions: For each goal in the prior year LCAP, review the progress toward the expected annual outcome(s) based on, at a minimum, the required metrics pursuant to Education Code sections 52060 and 52066. The review must include an assessment of the effectiveness of the specific actions. Describe any changes to the actions or goals the LEA will take as a result of the review and assessment. In addition, review the applicability of each goal in the LCAP.

Guiding Questions:

- 1) How have the actions/services addressed the needs of all pupils and did the provisions of those services result in the desired outcomes?
- 2) How have the actions/services addressed the needs of all subgroups of pupils identified pursuant to Education Code section 52052, including, but not limited to, English learners, low-income pupils, and foster youth; and did the provision of those actions/services result in the desired outcomes?
- 3) How have the actions/services addressed the identified needs and goals of specific school sites and were these actions/services effective in achieving the desired outcomes?
- 4) What information (e.g., quantitative and qualitative data/metrics) was examined to review progress toward goals in the annual update?
- 5) What progress has been achieved toward the goal and expected measurable outcome(s)? How effective were the actions and services in making progress toward the goal? What changes to goals, actions, services, and expenditures are being made in the LCAP as a result of the review of progress and assessment of the effectiveness of the actions and services?
- 6) What differences are there between budgeted expenditures and estimated actual annual expenditures? What were the reasons for any differences?

Complete a copy of this table for each of the LEA's goals in the prior year LCAP. Duplicate and expand the fields as necessary.

Financial acronyms used below:

- LCFF: Local Control Funding Formula funds
- SGF: Supplemental Grant Funds intended to be used to close the achievement gap, with a focus on meeting the needs of English learners, foster children, and socioeconomically disadvantaged students

					English learners completing the UC a-g college entrance requirements from no students to 40% of students. Other unduplicated students, including socioeconomically disadvantaged students, have UC a-g completion rates below the district rate. To close this achievement gap, our LCAP includes actions to remove barriers to access to our most rigorous course options and to improve academic preparation of unduplicated students and students with exceptional needs.						

		Metrics	Measureable outcomes

more children needing English language development instruction. All English learners at	where there are more English learners, have 2.0 FTE.
all elementary schools will receive a minimum of 150 minutes per week of ELD instruction.	where there are more English rearriers, have 2.0 f re.
[1.2]	Reading intervention is provided during daily 30-minute grade level regrouping periods
	where students are grouped for instruction according to what they need to learn next.
	During this regrouping time, Intervention Specialists have groups of six to eight students
	for intensive reading intervention, including direct instruction in phonics using SIPPS,
	work on word knowledge and decoding, reading comprehension, and writing skills.
	work on word knowledge and decoding, reading comprehension, and writing skins.
	The other grade level teachers teach an enrichment group using materials above grade
	level for advanced learners, a group for students on grade level, and a group for students
	performing slightly below grade level targeted on the skills that group of students needs
	to meet grade level standards. The teachers decide how often to regroup, and students
	move fluidly in and out of these groups according to their learning needs. We are in the
	process of developing a system to better track students who have participated in reading
	intervention, but overall reading performance is improving, and it is likely that this is due
	to reading intervention and regrouping students to meet their individual learning needs.
	to reading intervention and regrouping students to meet their individual learning needs.
	This system also serves students with exceptional needs in a true Rtl ² model. Children
	are served by need, not by label. Some students with IEPs need specialized instruction in
	the Learning Center, and are in groups taught by Special Education teachers and
	supported by Instructional Assistants during regrouping time. Other children with IEPs
	may need the instruction being delivered in one of the other groups, and our Special
	Education teachers facilitate participation by working with parents to modify IEPs to
	include this structure.
	include this structure.
	Cambridge, Center, and Foxboro are targeting first grade for reading intervention by
	using a combination of Intervention Specialists and Kindergarten teachers (in the
	afternoon when they have no students). Having all the first grade teachers, all the
	Kindergarten teachers, and two Intervention Specialists available at the same time
	allows schools to provide 30 minutes of highly focused instruction to groups that
	average 9-10 students, with students needing the most help being in the smallest
	groups.
	All English learners participate in a minimum of 150 minutes per week of ELD instruction.
	Most designated ELD is provided by Intervention Specialists, with English learners
	grouped by grade range and English proficiency (CELDT) level. Students receive this
	instruction four times per week for 40 minutes or five times per week for 30 minutes. At
	some schools, Intervention Specialists collaborate with Kindergarten teachers to provide
	this instruction in the afternoon when the Kindergarten teachers have no students.

Hold regular, facilitated PLC meetings for all elementary teachers as part of the RtI ² system, where teachers have time to analyze data, group students according to learning needs, delve deeply into the CA standards in ELA and math, engage in cycles of inquiry into best practice, and plan effective instruction to close learning gaps. [1.3]	\$164,664 from SGF for subs and facilitation, \$720 from Educational Services funds for Kindergarten training support.	Grades 1-6 PLC meetings (90 minutes) are held every 3-4 weeks for 10 cycles per year. Roving subs are used to release grade 1-3 teachers and grade 4-6 teachers for 90 minutes to two hours, depending on travel time. Kindergarten meets 6 cycles per year, with full day meetings that include PLC work in the morning and training, lesson planning, and idea sharing in the afternoon. The afternoon sessions are designed to support our new Kindergarten teachers. Teachers meet in PLCs to analyze and discuss student data and areas of need. They use performance data to assign students to intervention and enrichment groups for upcoming regrouping sessions. They plan lessons to close learning gaps and move student performance forward. Our Intervention Specialists attended 15 meeting days to support data analysis, student regrouping, and planning. Teachers also review and discuss California's new ELA and math standards, curriculum, and teaching strategies. From this information, teachers form inquiry questions related to ELA and math to help improve teaching and student learning.		We used 437 sub days for a total cost of \$74,727 from SGF.

Provide Math 7 Lab and Math 8 Lab classes to provide concurrent strategic support fo students struggling in math. [1.9]	r 0.34 FTE, 2 sections, \$32,023 from Title I.	We found this year that the need was for two Math 7 Lab classes instead of one Math 7 Lab and one Math 8 Lab. At the semester, 56.6% of Math 7 students earned As or Bs indicating they were mastering content, and 22.3% of students earned Ds or Fs, indicating a lack of mastery. Success for individual students enrolled in Math 7 Lab is mixed. Lab classes appear to be helpful when students struggle in math but are experiencing success elsewhere. They do not appear to be effective for students who are experiencing little or no success in school. Their needs go beyond additional math instruction.	\$23,412 from Title I.

	 We found that our plan for elementary teachers to provide casual after school support in math was only partially effective. In addition, not enough of our struggling elementary foster children took advantage of tutoring. We think making the support more systematic will help with participation. In order to accomplish this, we will have after school tutoring centers at each elementary school next year. The tutoring centers will operate for one hour after school on Monday, Tuesday, and Thursday (108 days per year). The tutoring centers will be staffed with two teachers and four high school student tutors. We will provide late buses for Center and Travis students, where students cannot easily walk home. With a regular schedule for tutoring, teachers can work with parents to be sure students who need additional support attend. 				

Some of our students have not experienced much success in school, and may be reluctant to attend. We believe that our high school student tutors will be able to build relationships with these students and provide positive encouragement that will keep reluctant students coming for help.

- There is evidence that Algebra 2 Lab is effective. The ten students enrolled first semester earned one A, three Bs, and six Cs. No students earned Ds or Fs, so all of these students have completed one of the major barriers to UC a-g college entrance requirements completion. In the Algebra 2 Lab class, all students earned As except one, who earned a C.
- Elementary Intervention Specialists remain a top priority because of their effectiveness in increasing reading performance. Evidence of the effectiveness of their work includes STAR reading data. At the beginning of the 2014-15 school year, when we only had 5 Intervention Specialists, 45.5% of students scored proficient on the STAR reading test. At the end of the year, 58.5% scored proficient, a 13.3% increase that represents an additional 158 students becoming proficient. In addition, the percentage of students in the lowest group fell from 11.6% to 6.8% (-4.8%). The percentage of students in the next lowest group fell from 42.9% to 34.4% (-8.5%).

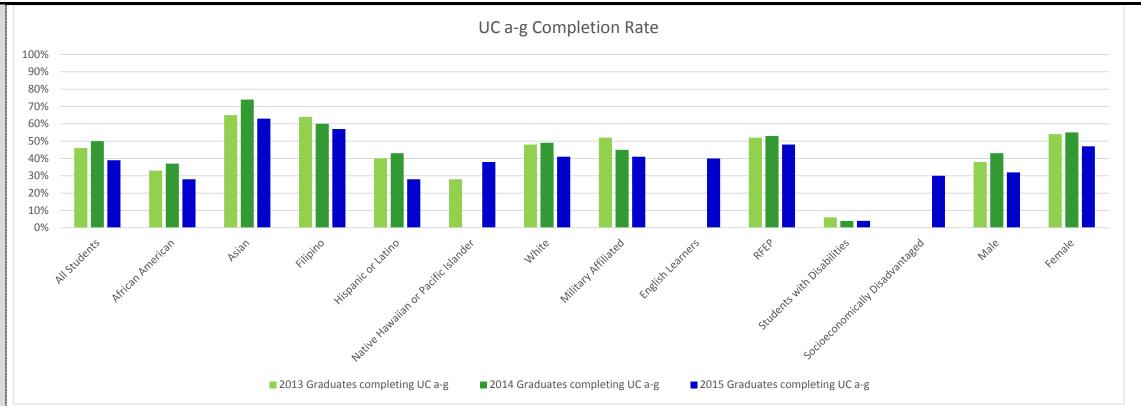

Winter reading fluency data provides an additional data point that indicates reading intervention is making a positive difference for students.

- Although the training from Corwin on Close and Critical Reading had outstanding videos that demonstrated to our teachers how to implement best practices in the classroom, technology problems due to network security settings made these training sessions extremely stressful for presenters, who often could not get the videos to project and had to improvise something for their audience of an elementary grade level. By the end of the four sessions, we were able to show the videos, but the hours it took to test everything in advance, and the stress on presenters who could not depend on the system working makes this an impractical staff development method. Although our teachers need to learn what is in the next three online sessions, we are not planning to continue with this program next year. In retrospect, we should have abandoned the program after the disaster we had during the first session.
- We found that the STEM context attracted English learners to our summer program in 2015. We also invited all foster children, who need no-cost activities and enrichment in the summer, and who acted as language models. The do-it, talk-it, read-it, write-it daily activities from the *Seeds of Science, Roots of Reading* curriculum from Lawrence Livermore Lab, along with field trips, not only provided opportunities to learn academic vocabulary and ELA/ELD standards, but also helped to close the socio-economic gap English learners often experience. This success informed our planning of summer programs for 2016.
- Elementary PLCs were successful, with some variation between individual PLCs in the depth of their work. Because of transportation time and the road closure in 2015-16, we organized our PLCs in North/South groups this year, with Cambridge and Foxboro making up the North team, and Center, Scandia, and Travis making up the South team. For 2016-17, we are considering different organizational patterns to improve the productivity of the groups.
- Aeries Analytics is proving to be a powerful and flexible tool. It reduced our ongoing annual data warehouse cost, and is providing more actionable data than was possible to provide with the previous system. We are using the Aeries system to create answer sheets for math screening assessments so that we can get results into useful form quickly to inform student course selections in secondary schools. We are also using the system to administer the Gates-MacGinitie Reading Test to students with low performance to screen for students needing intervention classes.
- We are expanding Kagan Cooperative Learning training to include all five days. Teachers are finding that cooperative learning increases student engagement and learning.

- We continue to see differences in UC a-g college entrance requirement completion rates between subgroups. Success in Algebra 2 remains the major barrier to college entrance requirement completion. Our work with Naviance, starting in the 7th grade, should help with this. Students need to understand the requirements, and the implications of math course choices and grades. We are doing a better job working with students who fail classes so that they do not become credit deficient, but much work still needs to be done to increase the number of students completing college entrance requirements.
- With the completion of the remodel of the old Vanden Library during the summer of 2016, the Vanden Tutoring Center will be able to operate at full strength M-Th to provide the support students need to improve their success in math and other subjects. Parents support having regular support available so that students can drop in when they need help or to study for tests.
- The Math in Focus training appears to be effective. Classroom observations show teachers are becoming increasingly comfortable with Singapore math as evidenced by increased use of strategies such as the use of number bonds, base 10 blocks, and model drawing.
- We see the same pattern in EAP pass rates as we do in other measures of college preparation. 68% of our students scored ready or conditionally ready for college on this year's EAP (from Smarter Balanced). Only 27% scored ready or conditionally ready in math, which emphasizes the importance of working on math success.
- Fewer students passed Advanced Placement exams than in previous years. Our first step in addressing this problem is reducing barriers to enrollment in Advanced Placement. The Vanden English Department has agreed to allow all students who earned As, Bs, or Cs in their current English class to enroll in AP English Language & Composition and AP English Literature & Composition. Requests for Advanced Placement courses are up in all subject areas, and we will be able to offer more courses. Some students may need additional support or study groups to succeed in these rigorous courses, and that support can be provided in the Vanden Tutoring Center four days per week. The low percentage of Hispanic/Latino students (12.5%) compared to their percentage in the population (21.1%) is a concern, and we need to do more analysis to find out why that is and how we can improve in that area.

- The most useful measure of English learner progress is whether students are making the expected gain of at least one level on CELDT each year. When a student grows a level or more on CELDT each year, we have evidence that the instruction received is appropriate. We need to look more deeply at students who are stuck on a level or whose performance declines. Our new progress monitoring assessments will help in that effort. The overall program seems to be working. Where individual students are not making gains, we need to find out why that is and change the instruction the student is receiving.
- Imagine Learning English remains popular with elementary English learners, and teachers believe it is effective. We do not believe that software-based instruction is the best use of designated ELD time, so we plan to increase the amount of time elementary English learners are spending on Imagine Learning English by sending them to the tutoring center after school, where staff can support their use of the software.

Original GOAL from prior year LCAP: Engage students in standards-based core curriculum and rich, rele		evant experiential	learning	Related State and/or Local Priorities: 1 2 3 4 5 6 7 8 Local:

Expected Annual Measurable Outcomes:	Metric 2A: Career Technical Education program completion	overall and for subgroups.	2015-16: Percentage completing CTE program in 2014 plus 2% overall and for subgroups. We have met the district target for this outcome if 80% of		Metric 2A	Measureable outcomes Identifying completers of career technical education pathways that are aligned to California CTE standards is challenging because we have a graduation requirement for CTE that includes many courses that are unrelated to true CTE pathways. We have a great deal of work to do in this area to align our CTE pathways to the standards, and part of our Career Technical Education Incentive Grant plan includes aligning our CTE programs to pathways. In 2015, seniors had completed second year courses in the following pathways: • Transportation = 10 students • Engineering and Architecture = 16 students • Public Safety (JROTC) = 20 students • Business and Finance = 38 students We had 220 students (grades 10-12) complete a second year CTE course. This group included one English learner and 26 RFEP students, one student with special needs, one foster child, and 59 socioeconomically disadvantaged students. There were 61 unduplicated students in this group.
	2B: Elementary enrichment (after school and/or summer enrichment programs in arts and STEM)	2015-16: Number of K-6 students par enrichment programs in arts and STEN	·		2B	627 elementary students, including 134 English learners, 5 foster youth, 17 homeless students, students with exceptional needs, and low socioeconomic status students participated in Arts Adventures this year.
	2C: Course Access	courses of study as required in Educat	Continue to provide 100% of students with access to a broad courses of study as required in Education Code §51210 and §51220(a-i). See details in Appendix A, Goal 2.		2C	All students TK-12 were provided with the broad course of study as required in the Education Code. Evidence of this can be found in elementary daily instructional schedules and secondary master schedules.

	Math 8 2013-14	237	35.7	1.97	17	7.1	65	27.1	74	30.8	57	23.8	24	10.0	81	33.8	34.2

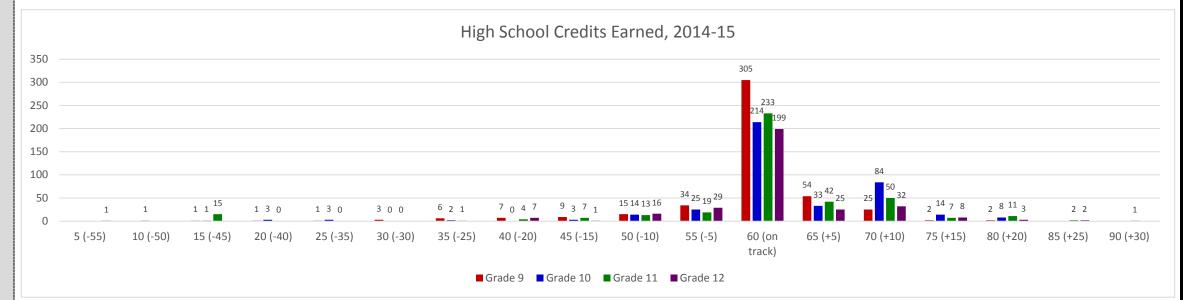

In Algebra 1 and Math 8, class size reduction seems to be having a positive effect. In Algebra 1, the mastery rate (A or B) has increased from 22.1% to 54.3%, a gain of 32.2%. The unsuccessful rate (D or F) has gone from 42.8% to 18.8%, a reduction of 24.0%. In Math 8, the mastery rate (A or B) has increased from 34.2% to 50.7%, a gain of 16.5%. The unsuccessful rate (D or F) has gone from 33.8% to 23.0%, a reduction of 10.8%.

The picture is less clear in English 1, where we saw real improvement the first year of the class size reduction but a reduction in performance in 2015-16. It is also less clear in Math 7, where average class size is not as low as it was in 2013-14. Further analysis at the school site is needed to determine what we need to do differently to improve student results.

- When we analyzed metric data, we found we needed to improve our system for tracking CTE pathway participation and completion. Our old CTE completion figures did not provide a good measure of students completing real CTE pathways that are aligned to California's CTE standards. For this year, we reported the number of students completing each pathway. In the future, we will tag these students in our student information system so we can better monitor our pathways.
- Our efforts to support students so they pass classes the first time and the use of Cyber High online courses have reduced the need for summer school. Instead of offering two sessions at TEC, we will only offer one. Due to declining demand, we are now able to offer summer school to freshmen who need to make up classes so that we can remediate any credit deficiency before it pulls the student off track. We are also seeing a decline in enrollment in alternative education because much of that enrollment is driven by credit deficiency. That is allowing the staff at TEC to focus on providing a small environment as an alternative to the large comprehensive high school.

• Students earning 30 credits in a semester or 60 credits in a year are on track. In 2014-15, 84.9 % of high school students earned full credits or more credits. 15.1% of high school students failed to earn credits in one or more classes. To date in 2015-16 (first semester credits), students are doing a better, with 88.7% of students learning full credits or more credits, and 11.3% failing to earn credits in one or more classes.

The pattern of course failure is worthy of consideration. 14.7% of freshmen failed to earn credit in one or more courses this fall. For sophomores, the percentage was 12.9%. For juniors the percentage was 6.3%. It is difficult to calculate this for seniors, who may have planned unscheduled periods. Part of what is driving the need for the Middle Grades Transition Task Force in LCAP Goal 1 (1.3.09) is concern about the performance of freshmen, who enter high school and rapidly become credit deficient. There is abundant research from the University of Chicago highlighting the importance of the freshmen year.

- Parents of elementary school students are happy that all students in grades 4-6 receive weekly music instruction. We have robust band programs at the middle and high school levels. Our community values the arts.
- Our competitive robotics programs remain popular and will be expanded next year. We made a decision to switch from Lego Mindstorms to VEX IQ in order to take advantage of our middle and high school students' expertise with VEX systems, which are used in secondary robotics competitions. We can support our teacher robotics team coaches with a couple of

high school students who know coding and robotics, which means more teachers may be interested in coaching because the technical knowledge required is not as great.

- Our PRISM robotics program in conjunction with SCOE and the UC Davis C-STEM center has taken off. PRISM has a strong connection to math beyond what is found in competitive robotics, so there is value in providing both. PRISM has "low floor, high ceiling" activities where all students can be engaged and find success, and the highest performing students can go beyond the basics. We are finding that students with IEPs are successful in this program, and that they feel good about their ability to write code and write code that controls a robot.
- Arts Adventures was popular with students and parents, with 624 students completing a 12-session arts course with integrated ELA. The program attracted and served English learners, foster children, homeless children, and low socioeconomic status children. Parents of English learners are strong supporters of this program and feel it is valuable for their children. We are adding a STEM program with the same format next year. At some schools, there are multiple teachers willing to teach these after school courses. At other schools, there is less teacher interest, which may become a problem we will need to address in the interest of equity and access. It is hard to quantify the pride students feel in the art pieces they created, but it is real, and builds students' feelings of efficacy and connection to school.
- Biotechnology I will be offered for the first time at Vanden High next year, and there is a great deal of student interest. Medical Science II will also be offered for the first time, with Medical Science I continuing. Video Production will also be offered for the first time. Our teachers are to be commended for their work on these programs, which are robust and aligned to the California CTE standards. The programs will grow and develop over the next few years, but this is an excellent start in a productive direction.
- Our Kindergarten teachers saw great differences in incoming Kindergarten students who had participated in Jumpstart Kindergarten, a 16-day program to get children ready to succeed in school. Because of the strong positive effect, we will offer five classes this summer. First 5 Solano will only fund classes for children with no preschool experience, so we are adding an SGF-funded class to serve English learners and other children who would benefit.

What changes in actions, services, and expenditures will be made as a result of reviewing past progress and/or changes to goals?

Our experience this year informed changes to the LCAP for next year.

• We compared last year's FIT (Facility Inspection Tool) report with this year's report, and saw improvements in the condition of our facilities. In 2014, we had 52 of 64 metrics rated Good or Exemplary, for a total of 81.3%. In 2015, we had 57 of 64 metrics rated Good or Exemplary, for a total of 89.1%. Our 1% increase target was exceeded.

- New materials need to be barcoded and distributed, so next year's LCAP includes four additional work days for Library Media Technicians.
- TUSD anticipates a significant number of new teachers next year, and we have included new teacher training in next year's LCAP. New teacher training, and work on ensuring all teachers are properly credentialed will support academic achievement for unduplicated students and students with exceptional needs.
- Teachers have requested that we remove the remaining chalkboards from classrooms and replace them with whiteboards or bulletin boards, and we added that project to next year's LCAP. Cambridge and Center have the most chalkboards to replace.
- Principals have requested a leadership role in establishing a standard technology configuration for classrooms and to work toward ensuring all classrooms have that configuration. This project has been added to the LCAP.
- During the recession, textbook adoptions were suspended, so we now have textbooks that need to be updated. At teacher request, and to inform financial planning, TUSD will develop a 3-year textbook replacement plan.

What changes in actions, services, and expenditures will be made as a result of reviewing past progress and/or changes to goals?

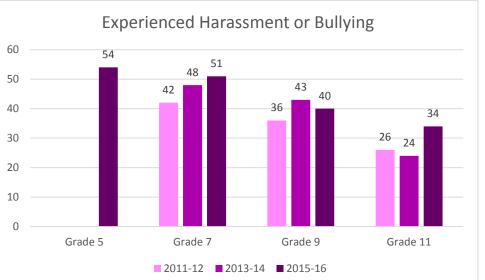

Our experience this year informed changes to the LCAP for next year.

- We need to continue improving our processes for following up when a student leaves one of our schools. Last year's data showed we had a middle school dropout, and the data from two years ago showed we had two. When we investigate students showing up as dropouts, we often find that the student's siblings appear to have transferred to other schools, often out of the country. In addition, we sometimes lose track of military children who move to other countries before they begin high school, where records begin to take on increasing importance. The Coordinator of Student Services will continue to work with secretaries and administrators to ensure that leave codes are queried each month, and that when there is an unresolved leave code in the database, action is taken to follow up to find out where the student has gone. We do sometimes have actual dropouts who have left school without graduating, and our systems do provide us with accurate information on those students.
- 2015-16 was the first year we have had social workers. We found this service to be very valuable, and much appreciated by students, parents, teachers, and administrators. There are waiting lists for students who would benefit from their services. Administrators say that they notice a sharp reduction in office visits for students who are being supported by a social worker. We plan to work on a system to document their effectiveness next year. The focus during this first year was to get the program up and running, and to develop appropriate processes and procedures for student referral. Due to the success of this first year, we plan to hire two additional social workers next year to help us meet student and family demand for this service.
- We are not planning to continue the attendance improvement campaign from A2A. Some parents found it annoying. We plan to include attendance reminders through our regular parent communication channels.
- Elementary students told us they use the strategies for conflict resolution they learned in Second Step, and we plan to continue to offer the online training to new teachers and any experience teachers who have not yet completed the training. Teachers schedule 30 minutes for socioemotional learning each week, which provides time for Second Step and instruction in PBIS behavioral expectations.
- Full implementation of PBIS is a goal for elementary schools in 2016-17. Many components are in place, but we need to make improvements in some areas and add some additional components. Secondary schools will begin to move forward in PBIS, starting with planning.
- The high suspension rate at Golden West Middle School (11.4%) remains a concern. The Middle Grades Transitions Task Force will analyze discipline data in addition to academic performance data to make recommendations for improvements. In addition, the Golden West staff will all participate in Kagan Win-Win Discipline training on one of the work days before school starts and on the October 10 staff development day. Decreasing the suspension rate will improve the academic achievement of all students, particularly unduplicated students and students with exceptional needs.
- We are adding a bilingual (Spanish) parent liaison position to work with families where students have attendance issues. Sending letters to struggling families is not effective and does not solve the problem. SARB alone is not enough. We need someone who can visit homes. This will also help us resolve potential dropout situations, where home visits may be needed.

• The data above is from the 2015-16 California Healthy Kids Survey (CHKS). The California Healthy Kids Survey was given to students in grades 5, 7, 9 and 11. Three year trends for students in grades 7, 9 and 11 and the current year results for grade 5 were reviewed in the areas of School Connectedness, Caring Adult Relationships, School Safety Perceptions and Experience with harassment or Bullying.

Of the four categories, Caring Adult Relationships rated the lowest overall. Current 5th graders gave a rating of 60% while all other groups rated 36% and lower for the current year. The three year trend for grades 7, 9 and 11 showed a decrease each year.

School Perception as being Safe or Very Safe showed the strongest results in each category with 78% of 5th, 61% of 7th, 53% of 9th and 66% of 11th graders reporting feeling safe or very safe. The three year trend for 11th graders showed a steady decline each year.

School Connectedness among students ranged from 37% to 58% within the last three years. Trends were relatively flat or showed a decrease. Experience with Harassment and Bullying showed an increase for grades 7 and 11 while 9th graders showed an increase last year and slight decrease this year, although this was a very small change.

In order to improve on these areas, we are planning various actions for next year. Teachers are participating in classes such as Kagan Cooperative Learning and Kagan Win-Win

Discipline, which not only help with learning, instruction and relationships, but also building community among the students, classroom, staff and school. We are expanding our social worker team, and continuing with Second Step, which both students and staff cited as effective when we were consulting with stakeholders about the LCAP. The district is taking steps to continue developing our PBIS structure and process to not only improve student learning of behavioral expectations, but to also provide consistency for students and staff to decrease conflict, increase a feeling of safety on campus and providing an avenue to address and decrease harassment and bullying. Reducing disruptions and improving relationships will support improved academic achievement for all students, especially unduplicated students and students with exceptional needs. Improving attendance by reducing out of school suspensions will provide more learning time and improve academic achievement for unduplicated students and students with exceptional needs.

What changes in actions, services, and expenditures will be made as a result of reviewing past progress and/or changes to goals?

Our experience this year informed changes to the LCAP for next year:

- When we began working on Action/Service #5.7 (provide translators), we found that obtaining translators was a major challenge for schools. When we dug more deeply into the situation, we found that there was no universal system for obtaining translators, and every time one was needed, resources were patched together to meet the family's needs. As a result, we are developing a system for all district schools to get easy access to translators. This system will have three parts. 1) We plan to hire a Parent Liaison in 2016-17 who is bilingual in Spanish who can provide translation services in addition to other services to families. 2) We are in the process of hiring multiple hourly translators who will be on call for this service. 3) We will subscribe to Alliance Translation Service, which is a phone translation service similar to Language Line, but at a much lower cost. Our families needing translation primarily speak Spanish (54%) and Tagalog (22%), with other languages being at 4% or below. Our plan is to hire staff bilingual in Spanish and Tagalog to serve 76% of our families, and to use Alliance Translation Service for the languages spoken by very small numbers of families. In addition, Alliance Translation Service can be used by any administrators or student support staff in an emergency situation. Improving translation services will improve communication with English learners, a group that is a focus for LCAP.
- Previous LCAPs have allocated small amounts of funding to parent outreach, which was ineffective because there was no person tied to the funding. This year, we restored a Coordinator of Student Services position that had been lost during challenging financial times during the recession. This position is focused on two goals in our 2016-19 LCAP: Goal 2, which is related to socio-emotional wellness, safe schools, and attendance; and Goal 4, which is related to parent involvement. In order for us to accomplish these important goals, the Student Services Department needs to have a parent liaison available to support families in their interactions with the school system and to work with families to improve attendance. We are eliminating the ineffective parent outreach and replacing it with a Parent Liaison position to better serve families and to help us accomplish LCAP Goals 2 and 4.
- Parents of English learners let us know at a DELAC meeting that they are happy with the programs and services we are providing to their students. They also let us know that they value their children having access at home to computer-based learning and practice programs such as keyboarding, *Imagine Learning English*, Math Facts in a Flash, and others. Parents in the Superintendent's Parent Advisory Group suggested we put out a letter to parents when school is out to let them know what programs students can access at home over the summer, and how to access those programs. We need to make this a priority, and included it in the 2016-17 plan.
- Watch D.O.G.S. is in place at our five elementary schools, and both children and fathers are enthusiastic about the program. We appreciate the contribution to school safety, a positive climate, and having male role models in our elementary schools.
- The implementation of READY! for Kindergarten was successful, although we served a small number of families in our first year. The Superintendent and a teacher who co-led the program made a presentation to the National Association of Federally Impacted Schools (NAFIS) to share this idea with other districts serving children living on federal property (military and Native American tribes).
- The LCAP for next year has increased emphasis on Parent Project and Parent Project Jr./Loving Solutions. We will coordinate our calendar with Vacaville to provide more frequent courses. We are finding an increase in children with challenging behavior, and parents are struggling as much as our schools are to turn this around so these children can find success. Parent support will be an important component if our Tier II and Tier III PBIS services are to be effective. We need to team with our families and work together.
- Parents have requested that we hold our family math nights and other curriculum nights earlier in the year, and we are planning those events for early fall.
- Parents requested that we expand our summer bridge materials program to other grade levels. In our pilot, we served lower performing students going into first grade, and found that the packets made a difference in fall reading scores. At parent request, we distributed a packet of Kindergarten summer bridge materials to families completing registration packets, and will provide all students going into first grade (current Kindergartners) and second grade (current first graders) a packet to support learning in ELA and math over the summer stop the summer slide. This material is especially important to improve the academic achievement of unduplicated students and students with exceptional needs.

Section 3: Use of Supplemental and Concentration Grant funds and Proportionality

A. In the box below, identify the amount of funds in the LCAP year calculated on the basis of the number and concentration of low income, foster youth, and English learner pupils as determined pursuant to 5 CCR 15496(a)(5).

Describe how the LEA is expending these funds in the LCAP year. Include a description of, and justification for, the use of any funds in a districtwide, schoolwide, countywide, or charterwide manner as specified in 5 CCR 15496.

For school districts with below 55 percent of enrollment of unduplicated pupils in the district or below 40 percent of enrollment of unduplicated pupils at a school site in the LCAP year, when using supplemental and concentration funds in a districtwide or schoolwide manner, the school district must additionally describe how the services provided are the most effective use of funds to meet the district's goals for unduplicated pupils in the state and any local priority areas. (See 5 CCR 15496(b) for guidance.)

Total amount of Supplemental and Concentration grant funds calculated:

\$2,154,926 (for 2016-17 from the LCFF Calculator)

How are the Supplemental Grant funds being used to meet the LCAP goals outlined above?

Research Base used to select Actions and Services

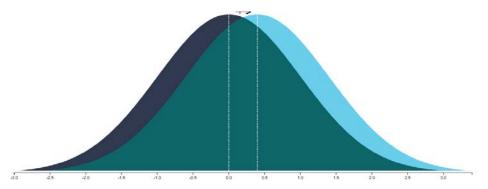

After an analysis of district, school, and subgroup data to identify areas of strength and areas where growth is needed, we used a comprehensive and respected research base to select actions and services for the LCAP. We used meta-analyses from Robert Marzano (*What Works* series) and John Hattie (*Visible Learning* series) to select instructional materials and strategies and school improvement strategies. We used the work of Rick Stiggins and Dylan Wiliam on the power of formative assessment to improve learning. We used *Positive Behavioral Interventions & Supports* (PBIS) research and best practices work done by George Sugai (University of Connecticut) and Robert Horner (University of Oregon, OSEP Technical Assistance Center) to design our system of behavioral supports and the socio-emotional wellness program.

California's Essential Program Components provided a foundation for developing schedules that allocate appropriate instructional time for core instruction and intervention. California State Standards and frameworks provided information about what students should know and be able to do and what should be considered during planning. We used research from the University of Chicago to identify freshman year success as a critical area of focus for our efforts to improve completion of the UC a-g college entrance requirements. The work of Rick DuFour on Professional Learning Communities informed our PLC planning process. Several online databases helped us evaluate relative effectiveness of instructional materials, programs, and practices: Johns Hopkins University's *Best Evidence Encyclopedia*, the American Institutes for Research's *National Center on Intensive Intervention*, and the *What Works Clearinghouse* from the Institute of Education Sciences.

What is an effect size?

Educational researchers want to know how instructional strategies and other variables affect student achievement. To find out, they assign students to two groups. There is a control group that does not use the strategy, and an experimental group that uses the strategy.

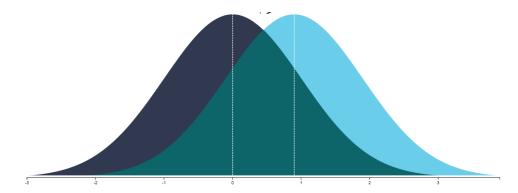

The curve below shows the effect of cooperative learning on student achievement. The dark blue area represents students who are in classrooms where cooperative learning was not used. The students in the overlapping light blue area were in classrooms where cooperative learning was used. When an assessment was given, the students in the light blue area scored higher on average than the students in the dark blue area. The difference in performance shows in the difference in the mean between the two groups, which in this case is 0.41 standard deviations.

This measurement is called the effect size. It expresses the increase or decrease in performance of the experimental group in standard deviation units. Effective strategies shift the performance of the experimental group to the right. With an effect size of 0.41, about 66% of the experimental group scores above the mean of the control group.

Effect sizes can be translated into percentile gains. Students in cooperative learning classrooms should score, on average, 16 percentile points higher on tests of what was taught than students who did not experience cooperative learning.

The curve below shows the effect of providing students with formative feedback about where their performance is compared to the learning target. Formative feedback has an effect size of 0.90. In this example, the shift of students to the right, which represents higher academic performance, is even greater than in the cooperative learning example above. With an effect size of 0.90, 82% of the experimental group will score higher than the mean of the control group.

Districts should consider implementation of strategies with effect sizes of 0.40 and above. There are some strategies with smaller effect sizes that are still useful, especially when combined with other strategies, but the emphasis should be on strategies with effect sizes of 0.40 and above.

Some strategies and variables hurt student learning. A graph showing the effect of retaining students in grade, which has an effect size of -0.16, would have the light blue part sliding to the left, below the dark blue part. That means students who are retained perform at lower levels than similar students who are not retained. Another example of a negative effect size is -0.34 for mobility. Students who move frequently between schools perform at lower levels academically than students who do not change schools frequently.

The information below describes why we selected the LCAP strategies included in the plan and why we rejected other approaches: why we believe the actions and services we selected are the best use of the funds. Effect sizes and other types of research data are included where they were available.

Why are Actions and Services provided on an LEA-wide basis?

Actions and Services are provided on an LEA-wide basis for two reasons. The first reason is that there may be a low number of students being served. Only about 3% of our students are English learners. We serve an average of 20 foster children. The needs of these small groups are best met by creating a district model for services with central office support to ensure all of the students receive the instruction and support they need. We use this model during the school year for ELD and foster youth tutoring, and we use it for summer school, where we group students according to the instruction they need.

The second reason services are provided on an LEA-wide basis is for efficiency and effectiveness. An example of this is our keyboarding program. Teachers from multiple schools evaluated various options, and we selected one program for the district. Educational Services staff manages passwords and accounts to avoid burdening busy school staff. Our PLCs involve teachers from more than one school to allow the sharing of a broader range of perspectives and ideas. We use the same benchmark assessments across the district to help us better identify best practices to share and to enable enhanced program monitoring. Our professional development programs are provided on a districtwide basis so that all teachers have the opportunity to participate. Our elementary summer programs are operated at two sites, with one in the Vacaville area, and the other on Travis AFB. Our elementary robotics program is run on a districtwide basis to provide a community of practice and budget support. We are a small district, and providing services LEA-wide is often the best way to ensure students are well served and get what they need: the best use of the funds.

Research and Support for Actions and Services in the LCAP

Guaranteed and viable curriculum

1.1.03; 1.1.04; 1.1.05

Work to develop a guaranteed and viable curriculum takes place on a districtwide basis because individual schools do not have the capacity to complete this work alone. We considered and rejected an approach where teachers worked on curriculum alone because all students deserve the opportunity to learn a common set of standards and/or learning objectives.

Instructional time and opportunity to learn an agreed-upon set of concepts and skills has the strongest positive effect on student achievement of any school-level improvement. We included actions in the LCAP to provide teachers with the time to come to consensus on essential concepts and skills to be learned in the course or grade level, develop pacing guides, develop formative and summative assessments, and develop and analyze actionable student performance data. This is ongoing work, where teachers used what they learned during one school year to inform improvements for the next.

We considered but rejected approaches where districts purchase these materials and hand them to teachers to implement. Our teachers are knowledgeable and highly skilled professionals, and we believe what they develop to support implementing a guaranteed and viable curriculum will be much more powerful than what is available commercially. These actions invest in deepening the professional capacity of our teaching staff and honor our belief that teachers, when provided the time and opportunity to work collaboratively, make the best decisions about curriculum, instruction, and assessment.

Progress monitoring assessments

1.2.02

There is a strong research base for the implementation of formative and summative assessments, both for progress monitoring and also for program evaluation. John Hattie found an effect size of 0.90 for formative assessment. Progress monitoring assessments and our PLC work are focused on assessment development and the use of data to inform instructional decisions.

We considered purchasing assessments, but at this time, using a combination of Smarter Balanced Interim Assessment Blocks (IABs), published normed reading assessments, and teacher developed tests seems to be the best way to provide data about where students are in relation to learning targets and to evaluate the effectiveness of activities in the LCAP. We are using a districtwide approach to ensure consistency in support of our guaranteed and viable curriculum. As improved assessment tools become available commercially, we may add to what we are currently using, but our plan is to continue to use a suite of published normed tests, Smarter Balanced Interim Assessment Blocks, and teacher created assessments to provide the information we need. Although we were disappointed in the data from the Smarter Balanced Interim Assessment Blocks this year because teachers only received general performance levels and not actionable data about areas of student strength and weakness, we understand that detailed information about student performance will be available next year, which will make the IABs a useful assessment tool.

Intervention Specialists

1.2.01

Students who our data shows are not making expected progress in reading need strategic and intensive support to gain knowledge and skills before they fall so far behind that they never catch up. Reading is the most important priority for the primary grades because students who do not read well by the end of third grade are at great risk for school failure and dropping out. Our Intervention Specialists are experienced and have extensive knowledge about the learning-to-read process, and they use research-based reading intervention materials to deliver short-term targeted instruction to small groups. Small, targeted instructional groups have an effect size of 0.49. Effect sizes from John Hattie on the strategies employed by the Intervention Specialists include vocabulary development at 0.67, repeated reading at 0.67, phonics instruction at 0.60, direct instruction at 0.59, and comprehension strategies at 0.58.

One of the challenges with English language development is making sure all English learners get at least 150 minutes of ELD instruction each week. In secondary schools, scheduling students into one or more periods of ELD (depending on student proficiency level) ensures that the instruction takes place. In the elementary schools, our Intervention Specialists are trained to provide that instruction, and there is time for ELD each day included in their schedules, ensuring that the instruction happens. We have also implemented new ELD materials in TK-8 that teachers report are engaging for students.

Alternatives to the use of Intervention Specialists include after school tutoring in reading, which we rejected because we could not ensure intensive daily reading instruction for all students who need it. After school tutoring can be helpful, but it does not replace daily instruction during the school day. We also rejected having classroom teachers provide this instruction to small groups while the rest of their class worked on something else. We have small numbers of students needing intensive ELD instruction, and a classroom teacher might have only two English learners. Quality ELD programs require direct instruction to be delivered to small group of students, and if the teacher is focused on two students for 30 minutes, the other 22 are probably not making learning gains. We also rejected after school ELD because we could not ensure that all English learners would get enough instruction to ensure that they make adequate progress toward proficiency in English. We are planning to provide additional ELD instruction after school, but it will not take the place of the minimum of 150 minutes of ELD during the school day. The districtwide approach guarantees these services to students, no matter which school they attend.

We also rejected the "wait to fail" model where English learners and students with reading difficulties are left to struggle for multiple years until they have fallen so far behind they qualify for Special Education services. Additionally, we rejected retention in grade to give students another year to learn, which has an effect size of -0.16. It is one of the few strategies commonly used in schools where there is overwhelming evidence that it significantly harms students.

Professional Learning Communities (PLCs)

1.1.01; 1.1.02

A look into the practices of school systems demonstrating dramatic results shows that PLCs are commonly used as a primary strategy. PLCs focus on data analysis, instructional planning, and action research as they answer these key questions:

- What do we want students to know and be able to do?
- How will we know they know it and can do it?
- What will we do when they do not learn?
- What will we do when they demonstrate the can do it/know it?

Our PLCs provide teachers with time to delve deeply into the curriculum, instructional strategies, and assessments. Rick DuFour's work and the All Things PLC website provide evidence of the effectiveness of this approach in districts with demographics similar to ours.

PLCs need to be facilitated to be effective, and developing an agenda, writing and distributing minutes, and completing tasks between meetings takes a significant amount of time. We have PLC facilitators to shoulder this workload. In addition, we are developing the capacity of multiple teachers to lead this important work.

We have confidence in the ability of our staff to define and solve problems related to student learning, and we rejected the alternative of hiring a consultant to come in to tell teachers what do to. (The use of consultants is very appropriate when requested by teachers, such as last year's request from 2nd grade for support from the Area 3 Writing Project staff to help them revise their writing pacing guide to better integrate the various genres of writing.)

We considered and rejected bringing in outside trainers to train our teachers. We believe that given time and resources, our teachers can effectively solve challenging instructional issues. We provide PLCs on a districtwide basis so that teachers at all schools may participate and learn from each other.

Positive Behavior Intervention & Supports (PBIS)

There is extensive evidence of the effectiveness of PBIS. Robert Horner, George Sugai, and Timothy Lewis summarized the evidence in an April, 2015 paper. Two papers included randomized controlled trials of PBIS. The papers cited below also provide evidence for PBIS effectiveness. We considered traditional approaches to discipline, but rejected them for lack of research evidence of effectiveness. We are developing a districtwide model for multi-tiered systems of support/Response to Instruction and Intervention to ensure that all students experience the benefits of this support.

Horner, R., Sugai, G., Smolkowski, K., Todd, A., Nakasato, J., & Esperanza, J. (2009). A Randomized Control Trial of School-wide Positive Behavior Support in Elementary Schools. *Journal of Positive Behavior Interventions, 11* (3), 113-144. This paper documents that typical state agents were successful in implementing SWPBS practices, and that these practices were experimentally linked to improved perception of school safety, with preliminary support that implementation was associated with improved proportion of students at 3rd grade who met the state reading standard.

Bradshaw, C., Koth, C., Thornton, L., & Leaf, P. (2009). Altering school climate through School-wide Positive Behavioral Interventions and Supports: Findings from a Group-Randomized Effectiveness Trial. *Prevention Science, 10,* 100-115. A randomized control trial documenting change in the organizational effectiveness of schools as a function of implementing SWPBS.

Bradshaw, C., Koth, C., Bevans, K., Ialongo, N., & Leaf, P. (2008). The impact of school-wide positive behavioral interventions and supports (PBIS) on the organizational health of elementary schools. School Psychology Quarterly, 23 (4), 462-473.

Bradshaw et al., document that implementation of school-wide PBIS by typical implementation personnel was successful in achieving high fidelity of adoption, and improved "organizational health" within the schools.

Bradshaw, C. P., Mitchell, M. M., & Leaf, P. J. (2010). Examining the effects of School-Wide Positive Behavioral Interventions and Supports on student outcomes: Results from a randomized controlled effectiveness trial in elementary schools. *Journal of Positive Behavior Interventions*, 12, 133-148

This randomized control trial documents experimentally that implementation of SWPBIS was related to (a) high fidelity of implementation, (b) reduction in office discipline referrals, (c) reduction in suspensions, and (c) improved fifth grade academic performance

Bradshaw, C., Reinke, W., Brown, L., Bevans, K., & Leaf, P. (2008). Implementation of school-wide positive behavioral interventions and supports (PBIS) in elementary schools: Observations from a randomized trial. *Education and Treatment of Children, 31,* 1-26.

The authors document a randomized control trial of SWPBIS with observations from school implementers.

There is also strong evidence for the use of check in/check out, which is part of an effective PBIS program, which can be found in the papers cited below.

Hunter, K., Chenier, J., & Gresham, F. (2014). Evaluation of Check In/Check Out for students with internalizing behavior problems. Journal of Emotional and Behavioral Disorders, 22(3) 135-148.

Stage, S., Cheney, D., Lynass, L., Mielenz, C., & Flower, A. (2012). Three validity studies of the Daily Progress Report in relationship to the Check, Connect, and Expect Intervention. Journal of Positive Behavior Interventions, 14(3) 181-191.

Todd, A., Kauffman, A., Meyer, G., & Horner, R.H. (2008). The effects of a targeted intervention to reduce problem behaviors: Elementary school implementation of check-in-check-out. *Journal of Positive Behavior Interventions, 10*(1), 46-55.

We are working on Tier I and Tier II behavior support using a PBIS model. We have some Tier III students who need significant behavioral support, and we are expanding our Behavior Intervention Specialist services to add additional support for students in general education who present with behavior that significantly interferes with their learning and the learning of others.

READ 180 and Math 180

1.2.09; 1.2.10

Implementation of these evidence-based middle school ELA and math interventions began this year. The What Works Clearinghouse from the Institute of Education Sciences stated that READ 180 has a positive effect on reading achievement (12% gain) and reading comprehension (4% gain). A study by MetaMetrics showed that Math 180 led to significant student growth in students with exceptional needs, students with very low initial performance, and English learners. Research from Clark County and Hillsborough Public Schools (Florida) also found Math 180 was significantly more effective than their previous math intervention programs.

We adopt curriculum on a districtwide basis to ensure that all students needing an intervention have access. We considered continuing to use ELA curriculum that had been in place for several years, but rejected that approach because we were not seeing the learning gains we expected. Because of this, we looked at research-based interventions and selected READ 180 and Math 180.

<u>Tutoring and support outside of school time</u>

1.2.03; 1.2.05; 1.2.08; 1.2.14; 2.2.13; 2.3.01; 2.3.02; 2.3.03; 2.3.05

The actions and services in the item numbers above detail tutoring and outside of school time instruction and support. We selected these strategies for several reasons. If all students are to learn at high levels, learning must be the constant. If learning is the constant, time must be the variable because it takes some students longer to master concepts and skills than other students. We can provide some additional instruction during the school day through small group instruction or strategic support classes. However, there is a fixed amount of time within the regular school day and year. For some students, additional time beyond the regular day is needed. Tutoring, online learning, and summer programs are Tier II supports in our Response to Instruction and Intervention system designed to provide the small group instruction needed by some students. We provide the services on a districtwide basis to ensure all students needing extra support have access.

Online learning can extend learning time by allowing secondary students who are credit deficient an opportunity to make up those credits after school. Online learning works for these students because they have already taken the course, and their reading levels are high enough so that they can learn from written material. They did not do enough work, or demonstrate adequate content area proficiency to succeed in the course, but they did learn something, so they are not starting without any knowledge and skill. They can build on the base acquired from the previous course during the online learning course to finally reach learning goals. The research on online learning is not robust and is largely confined to "replacement" online learning, where students do not receive any classroom instruction and all the instruction takes place online. Computer assisted instruction in general has an effect size of 0.37, which is moderate. We believe our model, where students repeat materials they did not previously master online, is likely more effective because students also had the benefit of experiencing face-to-face instruction first.

Tutoring programs extend the school day and have multiple benefits. First, tutoring is highly individualized and students can work on what they need to learn next, not what their class needs to learn next. Our tutoring programs use a combination of adults and high school students as tutors. A positive side effect of tutoring is that it provides a place for teachers and students to develop positive relationships, which then transfer back to the school day. The effect size of positive teacher-student relationships is 0.72. In our model, in addition to teachers, high school students staff the Vanden Tutoring Center and act as positive role models as well as tutors. Peer tutoring has an effect size of 0.55.

We offer a 7th period at Vanden High School so that students can take seven classes instead of six. That allows students opportunities for credit recovery, grade improvement for UC a-g, and the ability to take more courses when their schedules are impacted by participation in performing arts and CTE pathways. We also offer high school summer school for credit recovery and closing learning gaps. Improved grades and additional credits earned provide evidence of the effectiveness of this approach.

Summer programs extend the school year and allow opportunities for students to close learning gaps, have experiences that build their confidence as learners, and build positive relationships with teachers (effect size 0.72). Our summer programs are designed to include learning experiences that are different from what students experience during the regular school year. Readers' theater to involve middle school students in ELA is one example. Another is the use of *Sceds of Science, Roots of Reading* for an English language development summer camp. A science summer camp attracts students and provides instruction in a highly engaging context, and it is the use of oral and written academic language that makes a difference in learning, not the context. The science learning is a bonus. A 2014 meta-analysis by the American Institutes for Research found an effect size of 0.53 on literacy achievement that used an experiential approach. We are especially excited about what we are seeing in the summer Jumpstart program for incoming Kindergarten students who have not experienced preschool. In just 16 days, the students have become comfortable with school routines and procedures, following instructions, writing their names, playing cooperatively, and enthusiastically participating in learning activities.

We considered traditional remedial summer school for elementary and middle school students, where teachers repeat what was done during the year, but we rejected that option. If the instruction did not work during the school year, there is no reason to think it would work in the summer. Similarly, online learning as a credit recovery option for high school provides instruction in a different way from how it was provided during the regular school year, and provides a complement to the traditional summer school program.

English language development

1.2.04; 1.2.07; 1.2.13; 2.3.01; 2.3.02; 2.3.03

The Institute for Education Sciences was tasked with analyzing research on effective English literacy and language instruction for English learners. Their 2007 practice guide provides five recommendations that we have included in our elementary and secondary English language development programs. First, we screen for reading problems and monitor progress. English learners often develop strong verbal communication skills, but struggle with reading, so it is important to monitor reading achievement.

Second, we provide intensive, small-group reading interventions and English language development instruction. In 2015-16, ELD classes at Vanden High have 15 or fewer students. At Golden West, classes have 9 or fewer students. This provides an environment where students have a large number of opportunities to practice written and spoken English each class period. In addition, small class size ensures teachers can provide extensive formative feedback to each student.

Third, we provide extensive vocabulary instruction. Fourth, we focus on developing academic English. English learners usually acquire common, everyday vocabulary from exposure in context, but the development of the academic vocabulary needed for success in school takes carefully planned formal instruction along with quality learning materials.

Fifth, we use peer interactions to increase the amount of time English learners spend communicating in English. That could be a pair-share in an ELD class, or interaction with native English speakers during a summer science program. The use of these five research-based strategies make our ELD program an effective Tier II support in our Response to Instruction and Intervention system.

In addition to the actions above, to provide additional support for elementary English learners, we use *Imagine Learning*, an online language and literacy program with interactive games, activities, and videos, all focused on the acquisition of reading and language. Students find it engaging and motivating.

Another option for providing English language development is to have classroom teachers provide it in heterogeneously grouped classrooms. We rejected this option because we could not guarantee that all English learners would receive enough ELD instruction to make progress, and because it is nearly impossible for core academic teachers to provide high quality ELD instruction to a small number of English learners while also teaching the rest of their class. Where this method had been used in the past, data about English learner progress showed that it was not effective. Our teachers are growing in their use of SDAIE strategies to support English learners mainstreamed into core classes, but this instruction alone is not adequate to move all English learners to proficiency. Our English learners need targeted instruction specifically designed to help them acquire academic English. We provide ELD and ELD curriculum on a districtwide basis to ensure access for all English learners, whether there are large or small numbers of English learners at a particular school.

Concurrent strategic support classes in mathematics

1.2.09; 1.2.12

Some students need extended time to master the math concepts and skills needed to succeed in our college-preparatory math program. Providing concurrent strategic support classes doubles the time these students receive mathematics instruction. The strategic support classes focus on reviewing the lesson taught in the core math class; previewing upcoming core math class instruction, with a focus on vocabulary and review of prerequisite skills; and time for diagnosis of individual learning gaps and instruction to close them. These classes are Tier II interventions in our Response to Instruction and Intervention system. Adding time where students are engaged in learning has an effect size of 0.47.

We considered providing small group instruction for struggling students during the core math class, but rejected that because the needs of these students are too great to be addressed by casual regrouping within a heterogeneously grouped class. Although we have only one middle school and one comprehensive high school, we consider these services to be districtwide because the intent is for all students needing the support to have access.

Professional development

1.1.01; 1.1.02; 1.1.06; 1.1.07; 1.1.08; 1.1.09; 1.1.10; 1.1.11; 1.1.12; 1.1.13; 2.1.01; 2.1.02; 2.1.03; 2.1.04; 2.1.05; 3.1.02

The general effect size for teacher professional development is 0.62, which means it is a very effective way to improve student learning. Our professional development program is focused on ELA, math, technology, classroom management, socio-emotional learning, and implementation of new ELA materials. These areas were selected through an analysis of student data, teacher input, and our need to plan our next steps in ELA standards implementation in small chunks to avoid overwhelming teachers.

Math instruction presents a particular challenge for teachers. Not only do they need a strong content knowledge base in mathematics, but they also need a robust toolkit of instructional strategies. New math standards require a strong knowledge of strategies to develop number sense, including the use of ten frames, subitizing, number bonds, Base 10 blocks, and other concrete and pictorial ways to help students develop deep understanding. Model drawing provides particular challenges in the intermediate and middle grades. These pictorial models are powerful tools, but teachers need strong mathematical confidence to implement them effectively. It is this challenge that has led to our focus on professional development in mathematics. We began this work in 2011 with the UC Davis Mathematics Project, and are continuing to work with Singapore math trainers from our *Math in Focus* program. Teachers have developed their knowledge and skills to the point that we are now able to offer teacher-led professional development in math.

The National Center for Educational Statistics did a study that found students who completed a post-Algebra 2 math course (such as Pre-Calculus) and an AP English course succeeded in college at high rates while students who had not were at varying degrees of risk for dropping out (Adelman, 1999). Adelman's 2006 study reported on college completion rates for students who had completed different most advanced math courses.

	Calculus	Precalculus	Trigonometry	Algebra 2
College completion percentage	83	75	60	40

We need to work with our counselors and teachers to make sure that students and parents are aware of how course-taking patterns affect educational outcomes.

Adelman, C. (2006) The toolbox revisited: paths to degree completion from high school through college. Washington DC: U.S. Department of Education.

Adelman, C. (1999) Answers in the toolbox: academic intensity, attendance patterns, and bachelor's degree attainment. Washington DC: U.S. Department of Education.

We are continuing to offer training in Kagan cooperative learning strategies. Cooperative learning has an effect size of 0.41, and our model also includes metacognitive strategies, at 0.69. Kagan strategies increase students' active involvement in learning and their overall engagement.

Technology training for teachers emerged as a need because of new systems and processes. New curricula come with useful technology components. Parent communication must include web-based and other electronic forms, and we have included Schoolwires web development training in our plan. We have moved to Office 365. The online Smarter Balanced test means students need keyboarding and computer skills. Teachers are asking for technology training sessions to build their personal skill in using technology, best practices for implementing the technology scope and sequencing we are developing, and in using technology to promote learning. We are fortunate in that we have multiple teachers who know one or more areas well, and can provide this training.

We are also planning teacher-led training in classroom management. This need has emerged from teachers and is supported by classroom observations. Our new teachers in particular need support in developing routines and procedures; planning lessons that are engaging, interactive, and well-paced to prevent misbehavior; effective ways to respond to problem behavior; and strategies for working with students with special needs, especially those on the autism spectrum. In addition, we are planning more extensive support for beginning teachers who may need coaching.

In 2015-16, we implemented Close and Critical Reading training during elementary districtwide collaboration days. This program, developed by Fisher and Frey, will give teachers a strong background for the work in text complexity needed for successful implementation of new California ELA standards. In 2014-15, we focused on writing, and saw gains in student skill over the year. We have selected a narrow focus on close and critical reading because it is a high leverage strategy for implementing new standards, and because it will not be overwhelming to teachers.

We are planning to run a summer ELA institute for elementary teachers, including Special Education teachers, and secondary English teachers. The institute will be planned by a team that includes teachers, and will include time to learn about the new ELA materials we will be selecting, practice with instructional strategies used in the materials, and time to work in teams to revise pacing guides and identify or develop assessments to fit the new programs.

Our professional development resources are limited, so we considered and rejected a wider focus because we would have diluted resources to the point we were unable to support teacher growth in the areas outlined above. Our main professional development engine remains the PLC: our teachers have the ability to solve learning problems if they have time set aside to work collaboratively. We provide training on a districtwide basis so all teachers have equitable access and all students benefit. Many trainings are focused on the needs of unduplicated students, and if the training were not districtwide, not all teachers supporting unduplicated students would have access.

Music, arts, and STEM enrichment programs

2.3.01; 2.3.02; 2.3.03; 2.3.04; 2.3.07

Our stakeholders, including parents, students, and staff, provided extensive input during consultation about the value our community places on music, arts, and STEM programs. The community wants a rich, broad education for our children, and believes arts and STEM programs must be an integral part of what we offer. Arts programs have an effect size of 0.35, and STEM programs have an effect size of 0.53, so research supports this direction.

For secondary students, enrichment programs are delivered in art, drama, music, multimedia, science, technology, and engineering classes during the school day. Performing arts courses and competitive robotics extend into after school time and weekends. Secondary students have many choices of arts and STEM activities.

For elementary students, there is some art, music, technology, and science instruction during the school day. Engineering (competitive robotics) takes place after school. This year's LCAP adds an extensive after school Arts Adventures program that provides enrichment in visual art, drama, and video production, plus STEM programming that includes computer science, robotics, and engineering. In addition, we provide weekly music instruction for all students in grades 4, 5, and 6.

We rejected models that place all music instruction after school because it is very important to both our stakeholders and the Board that all students in grades 4, 5, and 6 have a music lesson once a week. Our programs are provided districtwide to ensure equitable access. Unduplicated students receive preferential enrollment, and need access to the program at their home school so that transportation is not a barrier.

Class size reduction

1.2.06; 1.2.11; 1.2.15

There is little research supporting the use of class size reduction unless teachers make significant changes in their instructional strategies to take advantage of the smaller class sizes. Class sizes averaging 24:1 in primary grades support allow us to create small intervention groups during regrouping, which is an instructional strategy that takes advantage of the smaller class sizes. We see gains in reading performance, and regrouping, as well as the Intervention Specialist program, is likely to be a factor. Please see additional research information on class size under Basic Services below.

Class size reduction in Algebra 1 and Math 8 this year yielded better student performance. We did not see similar gains from English 1 or Math 7 class size reduction. Where we do not see student performance gains, we will need to modify or discontinue strategies.

Class size reduction is districtwide to create equity. We considered leaving class sizes large, but rejected that to allow teachers an opportunity to implement instructional strategies that do not work with larger groups.

Career Technical Education (CTE)

1.3.03; 1.3.04; 1.3.05

Numerous research studies show the value of well-planned CTE programs that are responsive to the local labor market. CTE helps potential dropouts stay in school to graduate. Increased time spent in CTE classes raises student achievement and test scores. CTE concentrators, who have taken at least two courses in a career pathway, have a 13% higher graduation rate than students who do not complete a CTE pathway. We have two emerging programs in the biomedical sciences (2.9): Medical Science, which began this year; and Biotechnology, which will begin in 2016-17.

Our CTE programs are districtwide to allow all students, including unduplicated students, to have access. We considered multiple CTE pathway areas, but rejected those that did not lead to a living wage, and selected programs where there was strong regional demand by using federal, state, and regional occupational outlook data.

Naviance

1.3.07

Naviance is an online suite of digital tools for helping students identify their strengths, explore careers, compare colleges and other post-secondary educational options, and learn what it takes to succeed in college and career. We selected Naviance to fill a gap in our guidance curriculum that we need to fill in order to support all students in being college and career ready at graduation. We considered Bridges from XAP, but it is more expensive and fewer California schools use it. Regional Naviance implementation efforts connected to the NCCPA grant will support our work in this area. Small districts like ours need to join with other LEAs to develop sustainable training plans. Implementation is districtwide to allow all students to have access. This resource is particularly important for unduplicated students, who may not have a parent who has experienced the path to college.

Basic services

3 (all)

This goal to provide basic services came from the need to provide a strong foundation to accomplish the other goals. We must have highly qualified teachers, adequate instructional materials, well-maintained facilities, and smaller primary classes in order to work on the other goals. This focus on basic services as a foundation is well understood by stakeholders. Highly qualified teachers using appropriate instructional materials move students forward in their learning. Clean, well-maintained facilities are inviting and comfortable and make school a desirable place to be, which has a positive effect on school climate and learning.

Research on class size shows an effect size of 0.21, which is marginal for improving learning compared to the high cost of the additional staffing needed. However, researchers also found that teachers rarely change instructional strategies to take advantage of the smaller class sizes, so it is not surprising to see the modest positive effect. We can increase the effect by combining strategies. Smaller classes allow teachers more opportunities to develop positive relationships with students, which has an effect size of 0.72. Fewer behavior problems occur in smaller classes, and reducing behavior problems has an effect size of 0.34.

Most importantly, teachers learning new instructional strategies find them easier to implement when they have fewer students. Both direct instruction (0.59) and cooperative learning (0.41) are easier to implement at a high level of quality when there are fewer students to manage. This is because teachers who are changing practice are on a learning curve. Reducing the classroom management load during this learning period makes implementation easier. Teachers also end up with fewer assessments and assignments to grade and therefore have more time to score constructed response items and extended writing assignments.

We provide basic services on a districtwide basis to ensure equitable access for all students. We considered and rejected approaches where funds are given to sites on a per-student basis because this leads to inequity that often limits learning opportunities at schools where there are concentrations of unduplicated students. Equity does not mean providing the same thing for all students: it means ensuring all students have what they need.

Technology

3.3.04

We continue to have needs in the area of technology, and this year LCAP has a focus on technology used by teachers to provide instruction. We provide technology on a districtwide basis for equity, and as above, rejected approaches where school fund their own technology because that approach leads to inequities.

<u>Textbooks</u>

3.2.02; 3.2.04

The ELA materials we are currently using are not well aligned to California's new ELA standards, and we have selected new materials to implement next year. Effect sizes for instructional materials range from 0.03 to 0.17, which are small effects. However, without high quality, updated instructional materials, it is very challenging for teachers to provide the kind of instruction that has high effect sizes. We considered and rejected adding units from *Engage NY* or Georgia to supplement our current ELA materials because the books are so old they are beginning to fall apart, and because a choppy, pieced-together curriculum is challenging for teachers to deliver at a high level of quality.

We purchase and manage textbooks on a districtwide basis for efficiency and cost effectiveness and because having the same textbook at all schools supports a guaranteed and viable curriculum.

School Social Workers

2.2.03; 2.2.08

We are committed to the implementation of Response to Instruction and Intervention on the behavioral side as well as the academic side. On the academic side, we use Intervention Specialists to provide small group instruction to students struggling academically. On the behavioral side, we have hired two school social workers and will add two more. The social workers will provide small group instruction in social skills, anger management, coping with deployment stress, and other topics.

Social workers provide children with instruction in friendship development skills, and follow them out to the playground to coach them in the implementation of those skills. They will also be available for Tier III individual intervention for children who are experiencing severe problems with behavior. In addition, social workers are experts in connecting families with needed resources, and in pulling together wraparound teams.

The work of our elementary school social worker team will benefit individual students whose behavior is interfering with learning. Reducing behavior problems has an effect size of 0.34: when behavior problems are reduced, the whole class learns more. The social workers will support schools in implementing PBIS, and help teachers expand their toolboxes for dealing with challenging children. In addition, administrators will be able to shift some of the time they are currently using to work with children struggling with behavior and social skills to instructional leadership, which will also improve student learning at the school.

When we looked at the skill set needed to support students, families, and PBIS implementation, we felt that a masters in social work provided the best background for the combination of Response to Instruction and Intervention, PBIS, therapeutic, and family work. We provide these services on a district wide basis because that allows us to hire full time people and have them work at multiple schools.

Socio-emotional learning programs

2.1.01; 2.2.01; 2.2.03; 2.2.08

Part of our plan includes implementing Second Step, a socio-emotional learning program, in our elementary schools, with 30 minutes per week devoted to this instruction. Second Step has a strong research base. Students participating in Second Step have higher ratings of social competence, are less aggressive, more likely to select positive goals, more likely to engage in prosocial behavior, and less likely to engage in bullying.

In addition, a Columbia University study on six socio-emotional learning interventions including *Second Step* found that there was a reduction in child aggression, substance abuse, delinquency and violence; lower levels of depression and anxiety; and improved grades, attendance, and performance in core academic subjects.

We considered other programs and rejected them because they were more challenging to implement and took more training. Second Step has online training that takes three hours for both the Second Step lesson component and the bullying prevention component. In addition, there are clear teacher instructions for each lesson, and implementation little planning time. Students enjoy the activities. We provide Second Step on a districtwide basis to ensure equity because access to Second Step lessons is part of our guaranteed and viable curriculum.

Our data shows that cyberbullying is an area of concern at the middle and high school levels, and we are responding by selecting and implementing cyberbullying curricula. Research shows that antibullying programs reduce bullying incidents by about 15%. When programs encourage intervention of bystanders, 57% of bullying incidents stop within 10 seconds. Research also indicates that teens believe the most effective strategies are to block the online access of cyberbullies and to have students learn that they should not pass cyberbullying messages along (similar to bystander involvement). We need to consider research as we select strategies to address the problem.

Attendance improvement

2.2.02; 2.2.11

Attorney General Kamala Harris commissioned a study to examine the effects of student truancy and absenteeism in California. The study found that students who miss school at an early age are more likely to struggle academically and eventually drop out. In addition, for low income elementary students who have already missed 5 days, each additional school day missed decreased the student's chance of graduating by 7%. Dropouts, lacking an education, are more likely to be unemployed and are at risk of becoming involved in crime, both as victims and as offenders.

Our attendance improvement work is focused on chronic absentees, who miss 10% or more of the school year, and also on students whose attendance is below 95%, which appears to be the threshold where we begin to see academic problems related to poor attendance. We provide families with information about the importance of good attendance and follow up when attendance is a problem. Research from the University of Chicago shows that "nearly 90 percent of freshmen who miss less than a week of school graduate, regardless of their 8th grade test scores. Freshmen who miss more than two weeks of school fail, on average, at least two classes—no matter whether they arrive at high school with top test scores or below-average scores. In fact, freshmen who arrive with high test scores but miss two weeks of school per semester are more likely to fail a course than freshmen with low test scores who miss just one week." Attendance matters.

Our student information system will generate truancy/attendance letters, but the task of generating the letters falls on busy secretaries, who may have other urgent work and need to prioritize. It is important that we intervene early, and that we have accurate records. We considered having school sites do this work, but we rejected that option and decided to use an outside service to ensure timely intervention. This service is provided on a districtwide basis for efficiency, cost effectiveness and to ensure no students who need support are missed.

Parent involvement

4.1 (all); 4.2 (all); 4.3 (all)

We have included multiple parent involvement strategies in our LCAP:

- Parent advisory groups (Superintendent's Parent Advisory Group, DELAC, Military Parents, Foster Parents, School Site Councils)
- Parent curriculum nights
- Watch D.O.G.S.
- Parent education (READY! for Kindergarten, Parent Project)
- Outreach and translation
- Parent involvement at school
- Electronic communication through websites, email, and other electronic means

Parent involvement has an effect size of 0.51, demonstrating that it can make a significant difference in student achievement. In addition to the strategies listed above, we have extensive parent involvement in PTA and Booster group leadership, and in parents volunteering at school. We are adding Watch D.O.G.S. to increase the participation of fathers and father figures during the school day at the request of military parents, who have seen the benefits of this program in other schools where they have been stationed. One very positive part of the LCAP process has been listening to students and families who have been stationed around the world. They bring a wealth of experience with different school systems and have good ideas for how we can use some of those ideas in our district.

Parent advisory groups are an important part of our decision-making structures. As we were consulting with parents, our foster parents told us that they wanted to meet regularly. We have also added a group for military parents focused on special issues they face. We did not consider and reject strategies in this area; instead we listened to our stakeholders and selected strategies that they described as beneficial. Parent involvement is districtwide to ensure equity of voice and to give all parents opportunities to participate.

Parent Liaison

2.2.05; 2.2.12

A Johns Hopkins University researcher studied a parent liaison program, and found that the positions improved student outcomes by supporting teachers in understanding family culture, supporting family participation in school-based activities, collecting data to improve parent involvement, helping families navigate the school system, and providing direct services and connections to community services for families at risk. Families who completed surveys said the liaisons helped them understand how to support their children's learning, gave them encouragement and moral support, and provided material help. They also valued availability of the liaison and the liaison's ability to connect them to community resources.

Program evaluations of liaison programs have reported positive results for students, including improved educational outcomes as well as reduced dropout rates among Latino adolescents; increases to involvement of families with limited English proficiency and families of children with special needs. The United States Department of Education found liaisons can support school improvement efforts by obtaining information about the range of programs and services available at school and in the community and by helping parents use the technology connected to their child's education. Other research showed that liaisons should have an explicit and understood role as cultural brokers who minimize the influence of class and culture on home-school relationships while remaining institutional agents, promoting school initiatives/programs, and making schools open and accessible to all. In addition liaisons should target their efforts to the families of specific student groups in need of academic, behavioral, and emotional support. An article by Dretzke and Rickers (2014) in Education and Urban Society emphasized the importance of the role of the parent liaison in

creating a welcoming environment and establishing trust, and that it is important that the work hours of the parent liaison be flexible in order to support parents who are not available during the school day. We considered continuing with our old strategies alone (responsibility with sites, district-generated truancy notifications) but needed to add parent liaisons because our data shows the other methods did not adequately address the problem. We provide this services on a districtwide basis for equity and cost effectiveness.

B. In the box below, identify the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all pupils in the LCAP year as calculated pursuant to 5 CCR 15496(a).

Consistent with the requirements of 5 CCR 15496, demonstrate how the services provided in the LCAP year for low income pupils, foster youth, and English learners provide for increased or improved services for these pupils in proportion to the increase in funding provided for such pupils in that year as calculated pursuant to 5 CCR 15496(a)(7). An LEA shall describe how the proportionality percentage is met using a quantitative and/or qualitative description of the increased and/or improved services for unduplicated pupils as compared to the services provided to all pupils.

5.34 %

<u>Base Program</u>: In order to create a clear baseline to show what has been increased or improved, we used data from 2011-12, the year before LCFF, LCAP, and Supplemental Grant funds to determine the base program provided to all students. Actions and services listed below this table describe what has been increased or improved for unduplicated students over the 2011-12 base program.

	Elementary Schools	Middle School	High School	Alternative Education
School Days	179	179	179	179
Teachers	TK-3: 25.9 average class size 4-6: 27.7 average class size	29.1 staffing ratio, which yields an effective average class size of 33.9	25.8 staffing ratio, which yields an effective average class size of 32.1	TCDS: 5.5:1 ratio (2 teachers) TEC: 17:1 ratio (3.8 teachers)
	Elementary average 26.7

		purpose was to give students a head start on the		
		transition to middle school		

The following actions and services in the 2016-19 LCAP describe how actions and services to unduplicated students have been increased or improved over the services provided to unduplicated students in the 2011-12 base program.

- Services to students struggling with reading in elementary schools have been increased by providing a minimum of 150 minutes per week of intensive reading intervention from Intervention Specialists, with 2.0 FTE at Cambridge, Center, and Foxboro and 1.0 FTE at Scandia and Travis. (The number of FTE at each school is determined by the number of unduplicated students, with extra weight on the number of English learners because Intervention Specialists also provide ELD instruction.) Services have been improved through the purchase of research-based intervention curriculum and training of both Intervention Specialists and teachers who work with struggling readers during regrouping.
- Work on progress monitoring assessments improves our ability to identify students in need of intervention and increases our ability to monitor the effectiveness of our actions and services related to the area measured by the assessment
- Learning time has been increased by adding Tutoring Centers three days a week at our elementary schools. Effectiveness of after school tutoring has been improved by employing high school student tutors as well as teachers, allowing tutoring in very small targeted groups.
- Services to elementary English learners have been increased by providing a minimum of 150 minutes per week of designated ELD instruction. The quality of ELD has been improved through the use of updated ELD materials. In addition, the Tutoring Centers will provide time for students to use *Imagine Learning*, a computer-based programs that support English acquisition. It is important that the 150 minutes of ELD remain focused on direct instruction from a teacher to a small group of English learners, and the Tutoring Centers provide a perfect opportunity to increase ELD learning time over the 150 minutes of designated ELD.
- Jumpstart Kindergarten increases learning time for students entering Kindergarten, and improves their adjustment to school by frontloading them with 16 days of time to learn routines and procedures, how to write their names, and how to work in a group setting. We have added an additional class through Supplemental Grant Funds on top of the four classes provided by First 5 Solano in order to serve unduplicated students who may have had some preschool experience, making them ineligible to participate in the other classes.
- We have reduced class size to an average of 24:1 across TK-3 (from 25.9 in 2011-12 before LCFF and LCAP).
- We have increased and improved services to middle school English learners by providing three sections of designated ELD where students are grouped by English proficiency level. In addition, services have been improved through the use of new ELD materials, and teacher training in the use of these materials. English learners receive a minimum of 220 minutes per week of ELD instruction.

- Services to unduplicated students in middle school have been increased and improved by providing after school tutoring to struggling students.
- Time to learn math has been increased for middle school students by providing concurrent Math Lab courses for strategic support. This improves the access of unduplicated students their grade level math course, keeping more students on the path to success in Algebra 2 and completing the UC a-g entrance requirements.
- Support for middle school students struggling with reading has been increased through implementation of READ 180 classes, and improved because READ 180 is a research-based intervention program.
- For some middle school students, Math Lab classes do not provide enough support for them to access grade level curriculum because of significant learning gaps. Services to these students, including unduplicated students and students with special needs, has been increased and improved through the implementation of Math 180, which is designed to close the skill gaps that prevent students from succeeding in grade level math curriculum.
- Class size has been reduced in middle school Math 7 and Math 8 classes in order to improve student learning and increase success in the college prep math pathway.
- In high school, Math Lab courses provide concurrent strategic support to increase the time available to master math content and improve student outcomes.
- Services to high school English learners have been increased and improved by providing two designated ELD classes. Each class provides a minimum of 250 minutes per week of designated ELD instruction, and having two classes improves the quality of ELD instruction because students can be grouped according to English proficiency.
- Learning time for high school has been increased by providing a Tutoring Center four days per week where teachers and student tutors help struggling students. Math support is a major emphasis of the Tutoring Center, and the addition of tutoring improves math instruction and increases the amount of time and support struggling students receive so that they master math, which is one of our areas of focus.
- We have reduced class size in high school Algebra 1, English 1, and support classes to increase teacher-student contact time and improve learning outcomes.
- Teacher training is provided to improve instruction and increase teacher effectiveness in both the delivery of academic content and in improved support for students struggling with socio-emotional issues.
- Teachers are provided with time to reflect on instruction, data, and best practices through PLCs and time provided to work on pacing guides, assessments, and lessons. These actions increase the quality of instruction provided to students.
- High school summer school increases the time available to master course objectives and improves the graduation rate.
- Alignment of CTE programs to the California CTE Model Curriculum Standards improves program quality and increases alignment to local and regional workforce demands.
- Reducing enrollment barriers to Advanced Placement and other rigorous courses improves the access of unduplicated students to the best possible preparation for college success. Screening and ranking barriers often have a differential negative impact on unduplicated students, who may, because of their life experiences, present as less qualified than advantaged students.
- Implementation of Naviance and improvements to our guidance program are critical components to improving services to unduplicated students, who may not have a college-educated parent at home who knows how to navigate higher education.
- Expanding the dual enrollment program with Solano Community College increases the ability of students to earn college credit before graduation from high school. This is an especially important opportunity for unduplicated students, who may face significant economic barriers to college enrollment.
- The Middle Grades Transition Task Force will develop a plan to increase the success of unduplicated students and improve their success in high school.
- Training Instructional Assistants will improve services to children with exceptional needs, some of whom are also unduplicated students.
- Our implementation of Positive Behavior & Supports (PBIS) will increase time for learning through the reduction of distracting behaviors and improve the success of unduplicated students.
- Social workers increase the socio-emotional support provided to unduplicated students, and help them work through challenges that interfere with school success. Foster children, for example, often struggle with adjustment to a new family and school, and need support in order to benefit from instruction.
- Increasing Behavior Intervention Specialist and Behavior Assistant staffing will improve services to students struggling with behavior and reduce classroom disruption that interferes with the learning of other students.
- The bilingual (Spanish) parent liaison will improve our ability to communicate with families of unduplicated students, including English learners. In addition, relationships developed by the parent liaison will improve student success in school by making parents more aware of the support we provide and more comfortable with their children's participation.
- The Student2Student program, which increases support for new students, includes unduplicated students in leadership roles. Unduplicated students will experience better school outcomes if they are warmly welcomed by their new school.
- STEM-themed summer day camp programs for elementary students provide preferential enrollment for unduplicated students and increase the amount of time they spend learning academic content and skills. In addition, students have opportunities to improve their social skills in a less structured environment than what they experience during the regular school year.

- The middle school summer program provides significant benefits to unduplicated students through activities that support academic success, enhance belonging, and build motivation for success in the following school year.
- After school elementary Arts Adventures and STEM classes provide unduplicated students with learning experiences similar to outside classes available only to more affluent families. This allows unduplicated students to explore their passions and develop their gifts, and helps to close the achievement gap.
- Programming and robotics instruction provides unduplicated students with the opportunity to explore a high-skill, high-wage field. In addition, programming and robotics require teamwork to meet objectives and create projects. Learning to work in a team provides a significant life advantage to unduplicated students.
- Providing a keyboarding program through the schools allows unduplicated students to have access to an important tool for developing 21st century skills that their families might not otherwise be able to afford.
- The purchase of new ELA materials will improve the access of unduplicated students to instruction aligned to California's English language arts standards.
- Parent involvement in decision-making and meetings with foster parents increases the influence of parents of unduplicated students on the district's instructional program and the activities and services in the LCAP. Increasing parent involvement in decision-making and improving relationships between district staff and families improves the quality of our planning and improves our responsiveness to community needs and priorities.
- The Watch D.O.G.S. program involves father and father figures at school, which increases the contact of unduplicated students with positive male role models.
- Translation services and outreach to parents of unduplicated students increases the involvement of parents of unduplicated students in their child's education.
- Providing Parent Project training in the district gives parents of unduplicated students an opportunity to add tools to their parenting toolbox.
- Parent curriculum nights provide parents with an opportunity to find out about what their child will be learning, improving home-school communication and increasing parent involvement.
- READY! for Kindergarten supports families of preschool children in preparing their children for school success. This is especially important for families of unduplicated students, who may not have other resources to bring learning materials into the home.
- Summer bridge materials given to incoming Kindergartners and students moving up to first and second grade provide unduplicated families with an extensive set of learning materials, including math manipulatives, at no cost.

NOTE: Authority cited: Sections 42238.07 and 52064, Education Code. Reference: Sections 2574, 2575, 42238.01, 42238.02, 42238.03, 42238.07, 47605, 47605.5, 47606.5, 48926, 52052, 52060-52077, and 64001, Education Code; 20 U.S.C. Section 6312.

LOCAL CONTROL AND ACCOUNTABILITY PLAN AND ANNUAL UPDATE APPENDIX

For the purposes of completing the LCAP in reference to the state priorities under Education Code sections 52060 and 52066, the following shall apply:

- (a) "Chronic absenteeism rate" shall be calculated as follows:
 - (1) The number of pupils with a primary, secondary, or short-term enrollment during the academic year (July 1 June 30) who are chronically absent where "chronic absentee" means a pupil who is absent 10 percent or more of the schooldays in the school year when the total number of days a pupil is absent is divided by the total number of days the pupil is enrolled and school was actually taught in the regular day schools of the district, exclusive of Saturdays and Sundays.
 - (2) The unduplicated count of pupils with a primary, secondary, or short-term enrollment during the academic year (July 1 June 30).
 - (3) Divide (1) by (2).
- (b) "Middle School dropout rate" shall be calculated as set forth in California Code of Regulations, title 5, section 1039.1.
- (c) "High school dropout rate" shall be calculated as follows:
 - (1) The number of cohort members who dropout by the end of year 4 in the cohort where "cohort" is defined as the number of first-time grade 9 pupils in year 1 (starting cohort) plus pupils who transfer in, minus pupils who transfer out, emigrate, or die during school years 1, 2, 3, and 4.

	(2) The total number of cohort members.
	(3) Divide (1) by (2).
(d)	"High school graduation rate" shall be calculated as follows:
	(1) The number of cohort members who earned a regular high school diploma [or earned an adult education high school diploma or passed the California High School Proficiency Exam] by the end of year 4 in the cohort where "cohort" is defined as the number of first-time grade 9 pupils in year 1 (starting cohort) plus pupils who transfer in, minus pupils who transfer out, emigrate, or die during school years 1, 2, 3, and 4.
	(2) The total number of cohort members.
	(3) Divide (1) by (2).
(e)	"Suspension rate" shall be calculated as follows:
	(1) The unduplicated count of pupils involved in one or more incidents for which the pupil was suspended during the academic year (July 1 – June 30).
	(2) The unduplicated count of pupils with a primary, secondary, or short-term enrollment during the academic year (July 1 – June 30).
	(3) Divide (1) by (2).
(f)	"Expulsion rate" shall be calculated as follows:
	(1) The unduplicated count of pupils involved in one or more incidents for which the pupil was expelled during the academic year (July 1 – June 30).
	(2) The unduplicated count of pupils with a primary, secondary, or short-term enrollment during the academic year (July 1 – June 30).
	(3) Divide (1) by (2).

8-22-14 [California Department of Education]

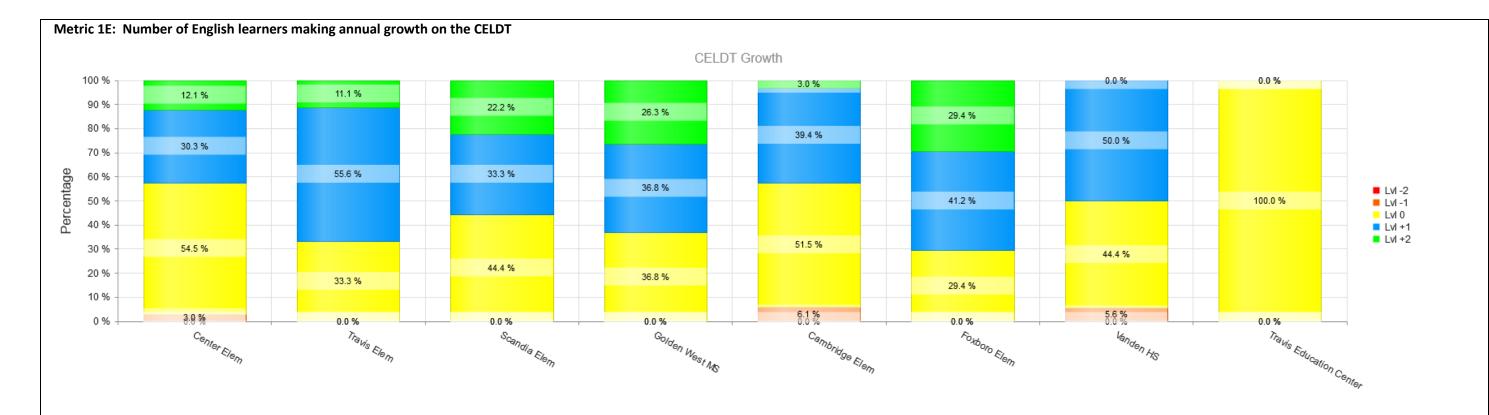

Appendix A: Data for 2015 Metrics

Goal 1: Data Tables

English Learner Progress

- Percentage of English learners making annual progress toward English proficiency (Annual Measureable Achievement Objective 1) [Targets for AMAOs are state defined targets.]
- English learner reclassification rate (Annual Measureable Achievement Objective 2)

Goal 2: Data Tables and Information
Students are enrolled in broad courses of study that includes all of the subject areas listed in the Education Code in Sections 51210 and 51220(a-i) Education Code §51210 outlines the course of study for grades 1-6. 100% of students receive instruction in all of the included areas: English, math, social science, science, visual and performing arts, health, and physical education. All elementary schools meet the Education Code §51210.1 requirement of 200 minutes of PE in 10 schooldays through a combination of Jumpstart PE, a morning exercise period led by a PE teacher, and PE classes taught by PE teachers that are part of the teacher preparation time requirements in the TUTA contract. Evidence for this may be found in prep PE, music, and teacher/grade level weekly instructional schedules. [Principals]
Education Code §51220(a-i) lists required subject areas for secondary schools: English, social science, foreign language, physical education, science, mathematics, visual and performing arts, applied arts, Career Technical Education, and automobile driver education. 100% of students have access to these courses during their high school years. Evidence that our schools meet this requirement may be found in secondary school master schedules and our graduation requirements. [Principals]

Programs and services for unduplicated students

This list includes some highlights of programs and services for unduplicated students. Support programs are available to all students who need them. In addition to the academic programs shown below, unduplicated students participate in enrichment in the arts and robotics, which also helps to close the achievement gap.

2015-16 Programs and Services	English Learners	Socioeconomically Disadvantaged Students	Foster Youth
Elementary Schools	 English Language Development instruction, minimum of 150 minutes per week from Intervention Specialist; ELD software ELD progress monitoring assessments to make sure all children are making expected progress After school elementary math support SDAIE strategies used in regular classrooms Interpreters for families as needed Summer ELD day camp focused on STEM Math in Focus math program makes extensive use of manipulatives and other non-verbal supports for understanding Arts Adventures after school program includes vocabulary and CA standards ELA instruction (no cost) Keyboarding and computer skills instruction Translation services for family communication 	 After school math support Intervention Specialists to provide targeted instruction in reading ELA regrouping 30 minutes each day to provide each student with the instruction they need to take the next step forward Summer day camp focused on STEM Ready for First Grade summer home learning program Arts Adventures after school program includes vocabulary and CA standards ELA instruction (no cost) Keyboarding and computer skills instruction READY! for Kindergarten program 	 After school tutoring, customized to the unique scheduling needs of foster children Intervention Specialists to provide targeted instruction in reading After school math support Summer day camp focused on STEM County tutoring referrals Ready for First Grade summer home learning program Arts Adventures after school program includes vocabulary and CA standards ELA instruction (no cost) Keyboarding and computer skills instruction READY! for Kindergarten program Meetings with foster parents
Middle Schools	 One or two periods of ELD daily, depending on student need NCLB tutoring Reduced class size in Math 7 and Math 8 SDAIE strategies used in regular classrooms Interpreters for families as needed Summer Adventure program Naviance system for exploring careers Translation services for family communication 	 Math 7 Lab and Math 8 Lab classes Reduced class size in Math 7 and Math 8 NCLB tutoring Summer Adventure program Naviance system for exploring careers 	 Math 7 Lab and Math 8 Lab classes NCLB tutoring customized to the unique scheduling needs of foster children Reduced class size in Math 7 and Math 8 Summer Adventure program Naviance system for exploring careers
High Schools	 One or two periods (depending on student needs) of ELD daily Vanden Tutoring Center support SDAIE strategies used in regular classrooms Interpreters for families as needed Credit recovery opportunities during the regular day, 7th period, online, or in summer school Translation services for family communication Naviance system for exploring careers 	 Math Lab classes Vanden Tutoring Center support Smaller learning environment at TEC, with a low ratio of students to staff to allow for building relationships Credit recovery opportunities during the regular day, 7th period, online, or in summer school Naviance system for exploring careers 	 Math Lab classes in Algebra 1, Geometry, Algebra 2 Vanden Tutoring Center support Credit recovery opportunities during the regular day, 7th period, online, or in summer school Naviance system for exploring careers

Programs and services for students with special needs

District services for all schools	Elementary schools	Middle school	High schools
 Student Study Teams for intervention prior to referral School psychologist and speech/language services Occupational therapist Behavior specialists District nurse, and health care specialists at each school Assistive technology and vision services through SCOE 		 Resource Center program for ELA and math Curriculum support classes 7-8 Special Day Class (mild to moderate) Extended School Year summer program 	 Resource Center program for ELA and math Curriculum support classes Learning Lab Workability program Resource specialists for academic support in alternative education programs Extended School Year summer program

Goal 4: Data Tables

State Priority 5: Student Engagement

School attendance rates

The data below shows that the district's attendance rate, school attendance rates, and subgroup attendance rates are not interfering with academic success, except for in alternative education and recently for students with disabilities. Instead of focusing on schools or subgroups, our improvement targets focus on supporting individual students whose poor attendance is interfering with learning. Data about chronic absenteeism is shown in B, below. Students who are truant or who have excessive excused absences are identified through our attendance monitoring system for SARB intervention. We believe that setting a target to reduce chronic absenteeism will be more effective in changing attendance behavior that damages learning than setting targets for improvement when rates are already over 95%.

	District	Cambridge	Center	Foxboro	Scandia	Travis	Golden West	Vanden	Travis Education Center	Male	Female	African American	Asian	Filipino	Hispanic or Latino	Native Hawaiian or Pacific Islander	White	Military Affiliated	Socioeconomically Disadvantaged	English Learners	Students with Disabilities	Foster Youth	Unduplicated Students

The data above demonstrates the need to continue our current focus on attendance improvement in alternative education. However, the data is not very useful in helping us identify other areas where attendance needs improvement, so we took another look at the data by grade level to select an area of focus for attendance improvement for the 2015-16 school year.

0-2% dark green, 3% light green, 4% yellow, 5% light orange, 6-7% dark orange, 8% and above red.

Grade	TK	K	1	2	3	4	5	6	7	8	9	10	11	12

Green = fewer dropouts than the state average. Yellow = equal to the state average. Orange = more dropouts than the state average. Red = more than 10% above the state average.

Target: 75% or more of the boxes above are green or yellow (at or below state overall dropout rate). For 2013, 41/51 boxes are green, or 80%.
